Vestas wins 29 MW order in Italy

Vestas has received a 29 MW order for the Mazara Messer Andrea wind park, to be located in Mazara del Vallo, Sicily, Italy. The contract includes the supply and installation of eight V136-3.45 MW delivered in 3.6 MW Power Optimised Mode. Vestas will also provide O&M services to the wind park for at least 10 years through an Active Output Management 4000 (AOM 4000) service agreement.

The order has been placed by the Italian wind power operator E2i Energie Speciali Srl, a company owned by F2i (Fondi italiani per le infrastrutture) and Edison.

“We are pleased to enter into this new supply agreement with our long term partner Vestas to build our latest wind plant in Mazara, another step for the green transition and towards the de-carbonisation targets we are pursuing” says Marco Peruzzi Chairman of E2i Energie Speciali and Executive Vice President Institutional Affairs, Regulation, Climate Change and Sustainability of Edison.

“We are proud to partner once again with E2i Energie Speciali, a key company for the development of wind energy in Italy, and one of our longer-lasting customers in the country. Their wind projects have featured many Vestas turbine variants, and with this order we once again showcase how Vestas’ technology continues to offer winning solutions to our customers in the Italian auctions”, says Vestas Vice President Sales Region Southern Europe and Turkey, Rainer Karan.

With this project, Vestas has secured more than 1.3 GW of contracts derived from auctions in Italy, where it has installed over 4.3 GW since 1991, accounting for more than 40 percent market share.

Turbine delivery is planned for the fourth quarter of 2021, whilst commissioning is expected for the first quarter of 2022.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 125 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 112 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
