Madrid, 31 March 2021

Vestas signs 50 MW order in Spain

Vestas has received a 50 MW order of V150-4.2 MW turbines for a wind park in Spain. The contract includes the supply and installation of twelve V150-4.2 MW wind turbines, two of which will be delivered in 4.0 MW power mode, as well as a 20-year Active Output Management 4000 (AOM 4000) service agreement.

“Vestas’ 4 MW platform, with its advanced full-scale converter, meets the most demanding requirements of Spain’s new grid code, giving our customers the reliability they need to develop new wind projects in the country. In this regard, it is the ideal technology to operate in a future energy system with an increasing participation of renewable energy sources”, says Javier Ojanguren, Vestas Country Manager in Spain.

Turbine delivery is expected by the third quarter of 2021 whilst commissioning is planned by the fourth quarter of 2021.

Since 1991, when Vestas installed its first wind turbine in Spain, the company has accumulated over 4.8 GW of installed capacity in more than 130 wind parks in the country.

The project and customer are undisclosed.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 132 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
