

News release from Vestas Northern and Central Europe

Hamburg, 11. June 2021

Vestas receives 108 MW order in Poland from DIF Capital Partners

Vestas has secured orders from DIF Capital Partners for four projects in Poland, all awarded in Poland's second auction round from 2019, cumulatively totalling 108 MW in capacity.

The four projects are Pruszcz (70 MW), Markowice (26 MW), Piaski (8 MW) and Wyszki (4 MW). The Pruszcz and Markowice projects are located in Kujawsko-Pomorskie Voivodeship, while the Piaski and Wyszki projects are situated in Wielkopolskie Voivodeship.

Across the four projects Vestas will supply and install 52 V100-2.0 MW turbines, as well as two V90-2.0 MW turbines. These orders build on the more than 2.6 GW of installed wind capacity that Vestas has already delivered in Poland.

Vestas will provide service for the projects through 20-year Active Output Management 4000 (AOM 4000) service agreements, providing power performance certainty and Vestas' industry-leading service expertise throughout the lifetime of the projects.

"We're pleased to be partnering with DIF Capital Partners for their next four projects in Poland, and continuing to deliver the wind-powered clean energy transition for Poland," said Richard Baylis, VP Sales East & Business Development at Vestas Northern & Central Europe. "The 2 MW platform turbines are perfect matches for these four projects, and Vestas is excited to build on the 2.6 GW of installed capacity we already have in Poland. With onshore wind delivering Poland's Just Transition, and offshore wind soon to come, Vestas is well-placed to support".

Turbine deliveries for all four projects are expected to begin in 2021, while commissioning for all projects will be completed by the end of 2022.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
