

News release from Vestas-American Wind Technology

Portland, 25 June 2021

Vestas showcases its multibrand repowering capabilities with a new order in the USA

Vestas has received a 31 MW order to repower an undisclosed wind project in the U.S. The repowering order consists of V110-2.2 MW wind turbines, which will replace the site's current technology. Including previously purchased 2 MW platform components, the project has a total nameplate capacity of 33 MW.

“Vestas successfully took over service and maintenance of these non-Vestas turbines in 2020, and we’re excited for the opportunity to upgrade the technology,” said Jeff Fuchs, Vice President of Sales for Vestas in North America. *“Repowering offers a great solution for asset owners of aging fleets faced with higher operation and maintenance costs and increased complexities of sourcing spare parts for obsolete technologies. This order adds to Vestas’ track record of more than 550 MW of non-Vestas repowers in the U.S. alone.”*

Vestas is the world's leading multibrand service provider, servicing more than 117 GW of wind turbines, globally, including 8 GW of non-Vestas turbines across the largest wind turbine brands.

This project includes a 20-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Deliveries will begin in the third quarter of 2022 with commissioning scheduled for the fourth quarter of 2022.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
