Vestas and Iberdrola finalise contract on Baltic Eagle offshore project in Germany

Vestas and Iberdrola have finalised the turbine supply contract for the Baltic Eagle project being developed off the island of Rügen, in German waters of the Baltic Sea.

Vestas will deliver V174-9.5 MW turbines to the 476 MW Baltic Eagle project, which will span a 40 km² area in the Baltic Sea and is located 75 km off the German coast. Baltic Eagle is Vestas' fourth offshore project in Germany, adding to the Borkum Riffgrund 2 and Deutsche Bucht projects which were delivered by the joint venture MHI Vestas Offshore Wind.

In delivering this project in collaboration with Iberdrola, Vestas will supply and install the V174-9.5 MW turbines, as well as service the turbines over a period of up to 10 years.

"We are delighted to be establishing our partnership with Iberdrola at the Baltic Eagle project in Germany, delivering our proven V174 platform," said Nils de Baar, President of Vestas Northern & Central Europe. *"We are pleased to be advancing Germany's clean energy and offshore wind ambitions at Baltic Eagle".*

Iris Stempfle, Iberdrola's country manager in Germany, said *"Baltic Eagle continues to progress on track, and we look forward to delivering another major project in the Baltic Sea. Adding to the existing Wikingen project it will enable us to benefit from efficiencies going forward, through technical advancements across the entire value chain and the use of the excellent infrastructure in Sassnitz. We are looking forward to the cooperation with Vestas and their reliable turbine. It is expected to contribute to the considerable performance output in our project and will help us trimming down the cost of offshore wind power in Germany".*

The project is expected to be completed in 2024.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
