

## News release from Vestas-American Wind Technology

Portland, 27 September 2021

### **Vestas sells 250 MW wind project in the USA developed by Steelhead Americas**

An undisclosed customer has acquired a 250 MW wind project from Steelhead Americas, Vestas' development arm in North America. This deal is another key milestone for Vestas to expand its presence in renewable energy development and open new markets for wind energy across the country.

Steelhead Americas is a wholly owned project development subsidiary of Vestas that aims to enable future growth of renewable energy assets in North American with over 3 GW of renewable energy projects in the pipeline.

The project, located in the US, will include 59 V150-4.2 MW turbines and one V110-2.0 MW turbine in 2.2 MW operating mode. After acquiring the project in 2019, Steelhead Americas led all development efforts including permitting, land acquisition, construction design and BOP contractor selection to deliver the customer a project that is ready for construction and installation.

*"As we look to continue to grow our development pipeline, we are excited to supply a construction ready project with the V150-4.2 MW flagship turbine to one of the global leaders in the renewable energy market,"* said Chris Rogers, Vice President of Development for Vestas Americas.

Vestas will provide supply, transportation, and commissioning of the turbines, as well as a multi-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Turbine delivery for the order begins in the first quarter of 2022 with commissioning scheduled by the end of 2022.

#### **About Vestas**

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 140 GW of wind turbines in 85 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 120 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
