

News release from Vestas Mediterranean

Madrid, 29 December 2021

Vestas wins 56 MW order in France

Vestas has received a 56 MW order for a wind project in France. The contract includes the supply and installation of eighteen wind turbines of the 4 MW platform including V136-3.45 MW, V126-3.45 MW and V117-3.45 MW turbines delivered in various power optimised modes as well as a 10-year Active Output Management 5000 (AOM 5000) service agreement.

The mixed platform site configuration in combination with a service agreement demonstrates both the flexibility of Vestas' 4 MW platform turbines, as well as Vestas' ability to create customised site layouts to optimise the energy production.

Turbine delivery and commissioning are scheduled for the second half of 2022. The project and customer are undisclosed.

Vestas installed its first turbine in France in 1991. Since then, the company has led the country's wind industry with over 6.1 GW of wind capacity installed and over 2,600 wind turbines. These numbers position the company as the main contributor to the expansion of wind energy in France, with a 30 percent accumulative market share.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 145 GW of wind turbines in 85 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 123 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
