Vestas secures 80 MW order in France

Renewable energy producer H2air has placed an 80 MW order for three projects in France. The Ardennes I wind park, to be located in Grand-Est, will feature 12 wind turbines from the 4 MW platform with V150 rotors. The Somme I and Aisne I wind parks, to be located in Hauts de France, will feature eleven wind turbines from the 4 MW platform with V126 rotors. The supply and installation order includes a 20-year Active Output Management 5000 (AOM 5000) service agreement.

Roy Mahfouz, CEO of H2air, says: *"We are proud of this success. Despite the challenges linked to the current conjuncture, it is due to a talented and pugnacious team and good partnerships that we have been able to launch the construction of these 80 MW. It is a part of a large portfolio which sustains the healthy and organic growth for H2air"*.

Vestas France Country Manager, Hugues Faivre, says: *"We are very glad to partner once again with H2air. Our 4 MW platform is designed to provide business certainty to our customers across a broad range of wind and site conditions. This versatility enables our customers to mix different turbine types, obtaining exceptional energy capture and optimizing the energy output of their wind parks"*.

Turbine delivery at Ardennes I is planned by the fourth quarter of 2022 and commissioning is scheduled for the first quarter of 2023.

Turbine delivery and commissioning at Somme I and Aisne I are planned by 2022.

Vestas installed its first turbine in France in 1991. Since then, the company has led the country's wind industry with 6.1 GW of installed wind capacity. These numbers position the company as the main contributor to the expansion of wind energy in France, with a 30 percent cumulative market share.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 145 GW of wind turbines in 85 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 123 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
