Madrid, 31 March 2022

Vestas secures 31 MW order in France

Renewable energy producer H2Air has placed a 31 MW order for several projects in Hauts-de-France and in Centre-Val de Loire. The order consists of two V126-3.45 MW, two V112-3.45 MW, one V117-4.2 MW, and three V136-4.2 MW wind turbines. Some of the wind turbines will be delivered in various power modes optimised for the local wind conditions, thus demonstrating how Vestas' 4 MW platform can cover all wind segments, enabling our customers to find the best turbines for each specific site.

The contract also includes a 20-year Active Output Management 5000 (AOM 5000) service agreement.

Roy Mahfouz, CEO of H2air, says: *"Vestas offers a wide range of turbines that suit our growing tailor-made project pipeline. It is essential to optimise the production and to get every green kWh. These are the fruits of many years of development, a sharp know how and trustful partnership with all project stakeholders. This is a part of our contribution for a peaceful and sustainable world".*

Vestas France Country Manager, Hugues Faivre, says: *"We are very proud to continue our collaboration with H2Air. We expect that the versatility and reliability of our 4 MW platform will enable H2Air to optimise the energy output of their wind park once again".*

Turbine delivery and commissioning are planned for the fourth quarter of 2022.

Since installing its first wind turbine in France in 1991, Vestas has led the country's wind industry with 6.4 GW of installed wind capacity, positioning Vestas as the main contributor to the expansion of wind energy in France with a 32 percent cumulative market share.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 151 GW of wind turbines in 86 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 129 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.

About H2air

Founded in 2008 by Roy MAHFOUZ, H2air is an independent French producer of renewable electricity. With 100 employees, 7 branches in France and offices in Berlin and Beirut, the team develops, builds and operates wind and solar farms in France and abroad. The group currently operates 500 MW, with 1 GW pending construction, and is developing more than 1 GW wind and solar power. H2air is proud to produce the energy of peace.
