Vestas secures 101 MW order in Italy

ERG, the Italian leading independent operator producing energy from renewable sources, has placed a 101 MW order for the Mineo Militello Vizzini wind park, to be located in Sicily, Italy. The contract includes the supply and installation of 24 V136-4.2 MW wind turbines as well as a multi-year Active Output Management (AOM 5000) service agreement.

"We are very happy to announce our partnership with ERG for this project which is the largest one we have signed in the last fifteen years in Italy. This signature highlights the versatility of our 4 MW platform and adds more than 100 MW of clean energy to the Italian energy mix, supporting, once again, the country's energy transition towards a more sustainable future", says Vestas Head of Italy, Francesco Amati.

Turbine delivery is planned by the second quarter of 2023 whilst commissioning will take place in the second half of 2023.

The project adds to the more than 5.4 GW wind turbines installed or under construction by Vestas in Italy, which accounts for a market share of more than 40 percent.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 154 GW of wind turbines in 87 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 132 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
