Hamburg, 30 December 2022

Vestas secures 50 MW order for a wind project in Germany

Vestas has received a 50 MW order to power an undisclosed wind project in Germany. The order includes a total of nine V150-6.0 MW wind turbines at a hub height of 166m with some units delivered in 5.6 MW operating mode.

The order includes supply, installation, and commissioning of the turbines, as well as a 20-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

"We are delighted to see the success of our EnVentus platform technology in Germany which leverages the versatility and strong performance of our modular design options, to support every client in the best tailored way possible," says Jens Kück, Vice President Sales for Northern and Central Europe at Vestas. "This is one of the largest single wind projects in Germany this year and the entire team at Vestas is proud that we have been selected for this project which plays an important role to accelerate the German energy transition".

Turbine delivery begins in the third quarter of 2024 with commissioning scheduled in the fourth quarter of 2024.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 160 GW of wind turbines in 88 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 140 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 28,000 employees are bringing the world sustainable energy solutions to power a bright future.
