

## News release from Vestas Asia Pacific

Singapore, 31 March 2023

### Vestas secures 130 MW order in India with Vibrant Energy

Vestas and Vibrant Energy have signed a deal for two wind projects in India. As part of the order, Vestas will supply a total of 36 V155-3.6 MW turbines.

This is Vestas' second order from Vibrant in India in less than a year, following a 54 MW order for a project in Maharashtra signed in 2022. With this, Vestas continues to solidify its position as a reliable and trusted partner in sustainable energy solutions in India.

*"Vestas has been our key partner in delivering our wind projects, and we are glad to announce the second order for V155-3.6 MW turbines. With this order of 36 turbines totaling 130 MW, we can strengthen our product offering for wind-solar hybrid power projects for our corporate customers. We look forward to expanding this partnership and delivering our shared vision of a sustainable-energy driven future",* said Srini Viswanathan, CEO – Vibrant Energy.

*"Vibrant Energy is one of India's fastest growing renewable energy companies. We have worked closely with them over the last one year over the execution of their current project in Maharashtra and I am confident that this second order will only be another steppingstone to a long and mutually fruitful partnership between the two companies. I would like to thank them for once again trusting in Vestas' ability to deliver reliable and efficient solutions",* says Purvin Patel, CEO & President, Vestas Asia Pacific

Deliveries of the turbines are expected to begin in the fourth quarter of 2023, while commissioning of all turbines is expected to be completed by second quarter of 2024.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 164 GW of wind turbines in 87 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 144 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 28,000 employees are bringing the world sustainable energy solutions to power a bright future.
