Vestas secures order for wind project to power cement factory in Italy

Vestas has received a 10 MW order for a wind project from Cementeria Costantinopoli Srl, a leading manufacturer of construction materials, to deliver renewable energy directly to their cement factory in the Basilicata region in Italy.

The wind farm will be located next to the factory and enable Cementeria Costantinopoli to supply energy on-site, covering approximately one-third of its electricity needs with secure, affordable and sustainable power.

The contract includes the supply and installation of three V117-3.45 MW turbines and it includes a 10-year Active Output Management 4000 (AOM 4000) service agreement.

"This project marks a milestone for Vestas in Italy as it is the first of its kind in the country to exclusively power an energy-intensive cement factory with clean wind energy, setting a precedent for industrial decarbonisation in the region. We are proud to deliver the technology solution that will reduce the plant's environmental footprint and reliance on external power", says Francesco Amati, General Manager, Vestas Italy.

"For Cementeria, the activation of the first wind farm for self-consumption in Italy, realised with Vestas technology, is not only an energy milestone, but also a tangible demonstration of our deep commitment to environmental sustainability. This strategic investment strengthens our leadership in the decarbonisation of the sector and underscores our commitment to building a productive future with reduced impact," adds Rabasco Roberto, Chief Sustainability Officer of Cementeria Costantinopoli Srl.

Turbine delivery and commissioning are expected in fourth quarter of 2026. The order also reinforces Vestas' leadership in the country's wind energy sector, where it has installed over 6 GW since 1991.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 197 GW of wind turbines in 88 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 159 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 37,000 employees are bringing the world sustainable energy solutions to power a bright future.
