

## News release from Vestas Mediterranean

Madrid, 14 April 2026

### **Vestas receives 70 MW order from Tessa Green Energy to deliver more wind energy in Bulgaria**

Vestas has received a 70 MW order from Tessa Green Energy to supply 11 EnVentus V162-6.4 MW wind turbines for the Strazhitsa wind project in Bulgaria. The order includes a long-term Active Output Management (AOM) 5000 service agreement.

The Strazhitsa wind farm represents a significant milestone for the revival of Bulgaria's wind energy sector. In early 2026, wind energy has played an important role in turning the country from a net importer to a net exporter of electricity, increasing its energy independence and reducing its exposure to volatile energy prices.

*"We are proud that Tessa Green Energy has trusted us for the Strazhitsa project in Bulgaria. Having a new project after a long pause in the Bulgarian market is very meaningful for Vestas, and we hope it will help spark a new era for wind energy in the country,"* said Srđan Ćenic, General Manager and VP Sales, Southeast Europe and Central Asia.

*"Our ambition is to become a leading company in the region, and it is essential for us to work with the best global partners. We are therefore pleased to launch this project in partnership with Vestas, and we believe this marks the beginning of a strategic partnership,"* said Alexander Manolev, CEO of Tessa Green Energy.

Vestas has played a pivotal role in driving wind energy deployment across Bulgaria since entering the market in 2007. With more than 360 MW of installed capacity, Vestas holds a leading market position in the country and operates a well-established and experienced service organisation, providing operations and maintenance services in Bulgaria and across Eastern Europe.

Deliveries are expected to begin in the first quarter of 2027, while commissioning is planned for the second and third quarter of 2027.

#### **About Vestas**

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 201 GW of wind turbines in 88 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 161 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 37,000 employees are bringing the world sustainable energy solutions to power a bright future.
