

# Traffic figures December 2025

## Norse Atlantic delivers 98% load factor and 22% passenger growth YoY

In December, Norse Atlantic Airways delivered strong passenger growth flying over 151 thousand passengers, an increase of 22% from the same month in 2024. The load factor was 98% across network and ACMI/Charter operations, up 4%-points year-over-year, and the fourteenth consecutive month above 90%. The load factor in own scheduled network was 96%, compared to 92% in December 2024. The Company operated 534 flights during December, of which 280 were in own scheduled network and 254 were ACMI/charter flights. 52% of the network flights departed within 15 minutes of their scheduled departure time, a 1%-point decrease YoY. Air Traffic Control (ATC) delays, airport congestions and weather delays negatively impacted on-time performance during the month, while capacity was temporarily reduced due to follow-on impacts on the engine maintenance program, as previously communicated.

### Key figures December 2025

compared year on year

| Load Factor                                 | ASK (millions)                            | RPK (millions)                            | Passengers                               |
|---|---|---|--|
| <b>98%</b>                                  | <b>1,363</b>                              | <b>1,332</b>                              | <b>151,449</b>                           |

### Traffic figures

**ASK (Available Seat Kilometers):** Number of available passenger seats multiplied by flight distance. | **Completion:** Percentage of scheduled flights that operated. | **LF (Load Factor):** A measure of how efficiently seats are filled, found by dividing RPK by ASK. | **Punctuality:** Aircraft departed within 15 minutes of the scheduled departure time in own network. Indicates on-time performance. | **RPK (Revenue Passenger Kilometers):** Number of sold seats multiplied by flight distance.
