

Xer Technologies Receives Follow-up Order from Independent Systems Integrator, PLATH

Xer Technologies AG (Xer Tech Holding AB, Spotlight: XER) has received an order valued at SEK 1.3 million from PLATH, a leading European systems integrator specialising in reconnaissance and electronic warfare solutions for land, sea and air applications, for an EO/IR camera. The order follows a previously awarded contract for a surveillance system that is currently being prepared. Delivery is expected in Q4. This repeat order reflects continued confidence in the X8 PRO's performance and reliability in demanding operational environments.

Configured with multiple payloads, the X8 PRO will provide an airborne Intelligence, Surveillance, and Reconnaissance (ISR) capability that can be rapidly deployed from austere environments. Designed for multiple operations, the platform combines vertical takeoff and landing (VTOL) capability with long endurance and low logistical requirements, enabling operators to establish persistent situational awareness without the need for prepared infrastructure.

The X8 PRO's modular architecture supports the integration of a range of electro-optical, infrared, and mission-specific payloads, allowing the system to adapt to evolving operational requirements. Its compact design, rapid deployment, and autonomous flight capabilities make it well suited for missions where extended endurance, flexibility, and resilience are critical.

Plath CEO Statement

"Modern intelligence missions require more than a standard sensor setup. They require systems that are designed around the operational use case. Together with Xer, we combine a capable airborne platform with PLATH's integration expertise to configure mission-specific sensor payloads for demanding ISR applications", says Gregor Zowierucha, CEO, PLATH GmbH & Co. KG.

Xer Technologies CEO Statement

"Plath's follow-on order is a strong vote of confidence in both Xer Technologies and the X8 PRO, reflecting the platform's proven operational performance. We're proud that the X8 PRO continues to demonstrate its capability and reliability in highly contested environments, where resilient UAS performance is critical to mission success", says Erik Herlyn, CEO of Xer Technologies AG.

About PLATH Systems & Integration

PLATH is an independent international systems integrator specialising in reconnaissance and electronic warfare solutions for land, sea and air applications. With over 350 systems in service

worldwide, PLATH is synonymous with proven performance and reliability. The family-run company, based in Hamburg, has over 70 years of experience.

About Xer Technologies AG

Xer Technologies AG, a wholly owned subsidiary of Xer Tech Holding AB, manufactures long-endurance hybrid-electric multicopters (UAVs) designed for industrial and government applications. The company's platforms support mission-critical operations, including power line inspections, mapping, surveillance, gas leak detection, rescue operations, and government-related applications such as Intelligence, Surveillance, and Reconnaissance (ISR) and mine detection. The company's shares are traded on the Spotlight Stock Market under the ticker XER. Learn more at www.xer-tech.com.
