

PRESS RELEASE

Middelfart, Denmark. 23rd September 2025

Peder Møller appointed CEO of Bunker Holding

Peder Møller will assume the role of CEO of Bunker Holding effective 6th October 2025. He is currently Chief Operating Officer for Bunker Holding, where he oversees global sourcing, physical supply, risk management, and new fuels.

In his role as COO of Bunker Holding, Peder Møller has been a driving force behind streamlining Bunker Holding's operations, unifying the company's supply structure, and strengthening commercial growth and capabilities in close collaboration with CCO Anders Grønberg.

Before joining Bunker Holding as COO, Peder Møller held the position as CEO of the energy hedging company Global Risk Management (GRM) from 2020 to 2024. GRM was established as a sister company to Bunker Holding in 2004 when expertise in energy hedging was spun off from Bunker Holding into a separate entity. The two companies continue to maintain a close collaboration.

During his time as CEO of GRM, Peder Møller navigated complex market environments during the energy crisis, focusing on risk management for both the company and its clients. Additionally, he has spearheaded the development of new business areas, both geographically and within the company's portfolio.

Peder Møller brings a strong background from the Carlsberg Group, where he concentrated on developing and implementing commercial strategies across Europe and Asia and held sales responsibilities at Carlsberg Denmark. Following his master's degree from Copenhagen Business School, he completed an Executive MBA at INSEAD and the Executive Leadership Programme at Harvard Business School.

Peder Møller previously served as Group Strategy and New Business Director from 2016 to 2020.
