

At a glance: Volvo EX30

1. The new, fully electric EX30 is Volvo's smallest ever SUV.
2. The EX30 is designed to have the smallest lifecycle CO₂ footprint of any Volvo car to-date – total carbon footprint over 200,000km of driving = below 30 tonnes*.
3. The EX30 contains 25% recycled aluminium, 17% recycled steel and 17% recycled plastic content – and an array of recycled and renewable materials in the interior.
4. The EX30 is as safe as you'd expect a Volvo to be, with state-of-the-art protection and collision avoidance technology. New safety tech includes a system to help prevent driver and passengers opening their door into the path of a cyclist approaching from behind.
5. Optional driver support includes:
 - New generation Pilot Assist, which now helps you to change lanes when indicating, and allows you more space for comfort when passing large trucks
 - New generation Park Pilot Assist – can detect free spots and take over the accelerator, brakes and steering to park the car (supervised by the driver)
6. Three different powertrain combinations (using two different battery chemistries) mean there's a version to suit all needs and lifestyles. Highlights:
 - Electric range of up to 480km (estimated, WLTP)/275 miles (estimated, EPA) (Single Motor Extended Range variant)
 - 0-100km/h in 3.6 seconds | 0-60mph in 3.4 seconds (Twin Motor Performance variant) – fastest accelerating Volvo car ever
 - DC charging capacity of up to 134kW (Single Motor) or 153kW (Single Motor Extended Range and Twin Motor Performance) – capable of charging 10-80% in around 26 minutes
7. The EX30 comes with Google built-in, including Google Assistant, Google Maps and Google Play store (China and South Korea have different systems).
8. The single, 12.3-inch hi-res display in the centre of the dashboard is designed to be easy to use. Key driving info is shown at the top, and there is a contextual bar at the bottom with shortcuts to the most relevant functions when you need them. A switchable 'Calm view' can strip away all but the essential info.
9. Connectivity-wise, the EX30 comes with:
 - Google services
 - Wireless Apple CarPlay as standard
 - A Volvo EX30 app giving access to convenient services and allowing remote control of many of the car's functions
 - Front and rear USB C ports for phone charging
 - Digital key car access (dependent on phone compatibility)
 - Over-the-air update (OTA) capability
 - 5G connectivity where available

10. Customers can choose between four distinct interior designs or 'rooms' (called Breeze, Indigo, Mist and Pine), each with a different combination of recycled and renewable materials including:
 - Woven flax – from the linseed plant (dashboard and door deco, Mist and Pine rooms)
 - Upcycled denim fibres from the jeans recycling process (dashboard and door deco, Indigo room)
 - Ground plastic waste from discarded plastic window frames and roller shutters (dashboard and door deco, Breeze room)
 - Tailored wool blend – 30% responsibly produced wool, 70% recycled polyester (seat upholstery, Mist room)
 - Nordico – a bio-attributed material partly made from Finland- and Sweden-sourced pine oil (seat upholstery, Breeze, Indigo and Pine rooms)
 - Knitted textile in 100% recycled polyester (seat upholstery, Breeze room)
 - 100% recycled PET bottles (carpets)
11. Smart interior storage ideas include:
 - Home audio-inspired soundbar** covering the full width of the dashboard removes speakers from doors, freeing up storage space and saving materials
 - Central glove compartment means driver and passenger can both reach it easily
 - Versatile central storage area between driver and passenger: convenient open storage area on the floor with hidden illuminated storage compartment underneath for small items, plus a sliding cupholder that can be extended for storing one or two cups, or slid back for extra storage
 - Phone storage at the front with wireless charging, and phone pockets in the front seat backrests for rear passengers
 - A removable rear storage box in the rear section of the tunnel console
 - A 'will it fit' size guide inside the rear tailgate, to help you work out whether a piece of furniture will fit (for example)
12. The EX30 features five different interior ambient light themes which slowly shift in tone and shade, inspired by Scandinavian landscapes, and each pairable with an ambient soundscape.
13. An EX30 Cross Country variant will also be launched for those who want big adventure from their small SUV – set for launch in 2024.
14. The EX30 will be available to order or pre-order from 7 June 2023 in certain markets.
15. Production of the EX30 is due to start later in 2023, with first customer deliveries expected early in 2024.

*The carbon footprint calculation of below 30 tonnes over 200,000km of driving is based on usage of charging electricity from the EU27 electricity mix. The lowest carbon footprint of any Volvo car to date statement relates to globally available products over 200,000 kms of driving.

**Includes the option of Harman Kardon Premium Sound with 1,040W amplifier and nine speakers

Powertrain highlights

Twin Motor Performance (AWD)

69kWh (nominal) NMC battery

Electric motor front and rear

Power: 315kW/428hp

Torque: 543Nm

Estimated range up to 460km (WLTP)/up to 265 miles (EPA)

0-100km/h in 3.6 seconds (0-60mph in 3.4 seconds)

Top speed: 180km/h (112mph) (restricted)

Towing capacity: 1,600kg

Est. charging time 10-80%: 26.5-28 minutes (DC fast charging, 175kW)

Single Motor Extended Range (RWD)

69kWh (nominal) NMC battery

Electric motor rear

Power: 200kW/272hp

Torque: 343Nm

Estimated range up to 480km (WLTP)/ up to 275 miles (EPA)

0-100km/h in 5.3 seconds (0-60mph in 5.1 seconds)

Top speed: 180km/h (112 mph) (restricted)

Towing capacity: 1,400kg

Est. charging time 10-80%: 26.5-28 minutes (DC fast charging, 175kW)

Single Motor (RWD)

51kWh (nominal) LFP battery

Electric motor rear

Power: 200kW/272hp

Torque: 343Nm

Estimated range up to 344km (WLTP)/up to 200 miles (EPA)

0-100km/h in 5.7 seconds (0-60mph in 5.4 seconds)

Top speed: 180km/h (112mph) (restricted)

Towing capacity: 1,000kg

Est. charging time 10-80%: 26 minutes (DC fast charging, 150kW)
