

Thomas Stovicek

Head of UX

Thomas joined Volvo Cars in 2018 and now leads a global UX team focused on transforming the experiences our customers have with the brand. Using empathy to understand customers, the team crafts engaging product and service experiences across Volvo Cars' ecosystem, which includes the website, the mobile app, the in-car system and more. Thomas has over 20 years of experience from software companies like Facebook, Nokia and Microsoft, which includes building and leading design teams, understanding customers, developing UX frameworks and defining engaging consumer applications. Thomas holds a master's degree in interaction design and has worked globally.
