

Marie Stark

Senior Design Manager

Marie has been the senior colour and material manager for the last 6 years and has worked at Volvo Cars since 2006. She has a bachelor's in Textile Design from The Swedish School of Textiles, and now works as a textile specialist focusing on sustainable materials. She is surrounded by an uplifting team and thrives in her varied work environment, where one day she might review the look and feel of carpet while the next give a presentation for a group people about Scandinavian Design.

Marie has had a longstanding connection with Volvo Cars brand: as a child one of her strongest memories was of her dad parking a new Volvo 244 with a bright blue exterior and matching blue upholstery in the driveway.
