

Simone Vizzini

Team Leader High Voltage Battery DESIGN

Simone Vizzini has worked at Volvo Cars since 2015 working with structural dynamics simulations. He has a Master of Science in Automotive Engineering at the Polytechnic University of Turin.

Simone is the Product Owner for High Voltage Battery System Design responsible for developing all battery systems from concept phase to mass production. Before that, he worked in the battery team as an advanced engineering leader investigating concepts, hardware, software, and business analysis for next-gen batteries.
