

GUNNAR OHLSSON

Product owner, interior systems

Having worked in the automotive industry since 2001, Gunnar Ohlsson's work is enhanced by years of experience from several different car companies. He started work at Volvo Cars in 2011 as a member of the Security Attribute Team, and has since worked in Interior Lights as a Task Leader, a System Architect, then, following a change in the Teams to Agile, as a Product Owner. In this role, Gunnar was successful in bringing new Interior Sensing Radar technology into the SPA2 platform cars.

Today, Gunnar is a Product Owner for Internal Perception and, as such, is responsible for Interior Radars at Volvo Cars.
