

Maria Bernander

Technical Expert Occupational Health Effects
Volvo Cars, Sustainability Centre

Maria Bernander obtained PhD in Inorganic Chemistry with focus on Environmental chemistry at University of Gothenburg in 2008.

She joined Volvo in 2014 and has been working in the environmental field ever since. She has had different positions all related to environment, including the areas of interior air quality, i.e. incoming air and emissions and smell from materials and environmental aspects of materials, i.e. contact allergies and sustainable materials.

She is since 2018 working as a technical expert focusing on the impact of materials and in-cabin air of customer health. Main focus is on research related topics within the area and how to develop the area within Volvo.
