Domestic air travel is big business in the US:
741 million domestic travellers annually,
worth **USD 132 billion** in revenue*

Of those, over **200 million** passengers fly
distances below **500 miles**

There are more than **500** flights a day between
Washington DC and New York City alone

*2017 figures, source Bureau of Transportation Statistics

In future, autonomous and electric technology can enable more comfortable,
more convenient and faster travel between cities
