## **Modirum Platforms Announces Partnership with TD SYNEX to Enhance Public Safety Communications in the United States**

*New York, 31 March 2026* — Modirum Platforms, a leading European technology provider of public safety and critical communication platforms, today announces a new partnership with TD SYNEX in the United States.

Organizations across Public Safety, Education, and Healthcare face increasing pressure to respond quickly to emergencies such as school lockdowns, medical incidents, security threats, and large-scale public safety operations. In many cases, teams must coordinate across multiple locations and agencies, yet communication tools remain fragmented and slow. This makes it difficult to share real-time information and maintain situational awareness when seconds matter.

The M Coremote NSC3 platform improves the efficiency and security of critical operations by unifying multi-source real-time feeds and AI-powered intelligence in a single platform. Designed for fast response and seamless collaboration, system enables organizations, command centers and field operators to stay in sync – validating incidents sooner, resolving conflicting information, and coordinating more effectively.

Additionally, NSC3 collects, synchronizes and gives visibility to live video streams from multiple sources, including drones, dashcams, smart devices, body-worn cameras, and IP cameras. LiveLink™ extends this visibility to the field, allowing mobile and temporary video feeds from citizens to be securely shared with command centers.

TD SYNEX is a critical partner because of its global reach, deep channel ecosystem, and strong presence across U.S. public sector, education, and healthcare markets. By combining Modirum Platforms' real-time collaboration technology with TD SYNEX's scale, the partnership can accelerate adoption and help institutions address urgent communication and situational awareness challenges more effectively.

“We are excited to be working closely with TD SYNEX and their channel partners to deliver secure communications technology that features the industry’s fastest patented video engine and built-in AI intelligence”, said **Brett Johnson**, U.S. Channels Director, Modirum Platforms.

“We are excited to partner with TD SYNEX expanding our reach into the U.S. market in our mission to become a global leader in this technology”, said **Sami Honkaniemi**, COO with Modirum Platforms.

“At TD SYNEX, we help our partners meet today’s needs and prepare for what’s next by bringing together specialized expertise and a unified digital platform experience,” said

**Scott Young**, SVP, Vendor Management, at TD SYNEX. “By adding Modirum Platforms to our portfolio, we’re expanding the breadth and depth of our public sector offerings so customers can increase efficiencies, differentiate in the market and drive future growth.”
