

PHOTOCAT

May 13, 2026

Photocat A/S publishes Annual Report 2025 and prepares for growth phase.

Photocat A/S today publishes its Annual Report for 2025. The Annual Report is attached to this Company News and is available on the Company's website.

During 2025, Photocat continued to strengthen its technological platform and product portfolio within air quality improvement, de-icing solutions and dust-control applications. The Company has expanded development activities and industrial validation across several technologies aimed at infrastructure, building materials and environmental applications.

Management believes that Photocat has now reached a stage where years of development work, documentation and industrial validation create a significantly stronger foundation for future commercial growth.

The Company's market focus will continue to target areas with substantial air pollution challenges and strong environmental demand. This includes airports, which represent significant sources of elevated NOx emissions, as well as major urban environments such as Madrid and Barcelona where Photocat offers documented solutions for both concrete and asphalt applications.

In parallel, Photocat continues to strengthen its broad portfolio within environmentally friendly de-icing and dust-control solutions.

Management believes that the Company's strengthened product propositions now combine significant performance advantages with sustainable environmental solutions in line with Photocat's long-term focus on improving air quality.

CEO Michael Humle comments:

"We believe Photocat has now reached a point where our technologies, documentation and industrial product platforms are sufficiently mature to support meaningful revenue growth. We have significantly strengthened our product propositions in recent years and today offer strong environmental solutions with documented performance advantages in several important market segments."

The Annual Report for 2025 can be downloaded from Photocat's website: [Announcements | PHOTOCAT A/S](#)
