August 19th, 2026

Photocat releases H1 2026 report.

Highlight during second quarter of 2026

- Public Tender Win: Won first municipal tender under Photocat's own name in Madrid.
- Dust Control Expansion: Partner network established with initial distribution partners in Denmark, the UK, and Poland, driving higher product volumes.
- Dual De-Icing Commercialization: Delivered first combined order of solid granulate and fluid de-icer to an aviation sector customer.
- Full-Year Guidance: Photocat maintains its FY 2026 guidance with projected revenue of DKK 13.0 – 15.0 million and EBITDA of DKK 0.5 – 1.5 million.

Highlight after 30th June 2026

- Flooring Market Resumption: Resumed product deliveries to the commercial flooring market following a period of paused activity.
- Tender Pipeline: Submitted formal tender proposals for airport de-icing in Poland with an estimated contract value exceeding EUR 4.0 million covering the period late 2026 through 2028.

About Photocat
Photocat manufactures patented coating materials for both outdoor and indoor applications with the effect to degrade NOx and VOC´s when exposed to light. Both NOx and VOC's are severely damaging to human health. Photocat's patented technology is a very efficient and an economically viable alternative to many of the traditional technologies targeting NOx (e.g. bus catalysts, flue gas cleaning etc.).

Photocat's shares are listed on Spotlight, with the ticker symbol PCAT.
