About Photocat
Photocat manufactures patented coating materials for both outdoor and indoor applications with the effect to degrade NOx and VOC´s when exposed to light. Both NOx and VOC's are severely damaging to human health. Photocat's patented technology is a very efficient and an economically viable alternative to many of the traditional technologies targeting NOx (e.g. bus catalysts, flue gas cleaning etc.).

Photocat's shares are listed on Spotlight, with the ticker symbol PCAT.
