

# Year-End Report 2025

## Business highlights, January–December 2025

- Final investment decision was taken for the Nordlicht I and II offshore wind farms in the North Sea, Germany's largest wind power project
- Decision made to proceed with two suppliers of modular reactors on the path towards new nuclear power
- Vattenfall's project company Videberg Kraft AB applied for financing according to the Swedish state's risk sharing model for investments in new nuclear power and an agreement was entered to sell 20% of the company to the consortium Industrikraft
- During the year, SEK 10.9 billion was invested in the electricity grid in Sweden to ensure a secure and stable electricity supply
- Vattenfall assesses ownership of its district heating operations across all markets
- Vattenfall received the highest rating in the Climate Disclosure Project's annual climate ranking, confirming our continuous efforts towards fossil freedom

## Financial highlights, January–December 2025

- Underlying operating profit<sup>1</sup> of SEK 30,937 million (17,059)
- Operating profit<sup>1</sup> of SEK 27,102 million (38,851), whereof items affecting comparability SEK -3,835 million (21,792)
- Profit for the period of SEK 19,700 million (33,380), whereof items affecting comparability SEK -3,835 million (21,792)
- The Board of Directors proposes a dividend of SEK 8,000 million

## Financial highlights, October–December 2025

- Underlying operating profit<sup>1</sup> of SEK 9,467 million (922)
- Operating profit<sup>1</sup> of SEK 9,279 million (5,023), whereof items affecting comparability SEK -188 million (4,101)
- Profit for the period of SEK 6,603 million (5,084), whereof items affecting comparability SEK -188 million (4,101)

## KEY DATA

Amounts in SEK million unless indicated otherwise	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024
Net sales	234 915	245 570	67 134	68 488
Operating profit before depreciation, amortisation and impairment losses (EBITDA) <sup>1</sup>	49 236	60 779	15 337	10 743
Operating profit (EBIT) <sup>1</sup>	27 102	38 851	9 279	5 023
Underlying EBIT <sup>1,2</sup>	30 937	17 059	9 467	922
Profit for the period	19 700	33 380	6 603	5 084
Electricity generation, TWh	102.1	99.6	27.8	24.4
Sales of electricity, TWh <sup>3</sup>	164.9	160.2	42.3	41.0
- of which, customer sales	116.5	115.9	29.2	30.4
Sales of heat, TWh	4.5	9.1	1.4	1.6
Sales of gas, TWh	65.0	57.9 <sup>4</sup>	19.1	22.1 <sup>4</sup>
Return on capital employed excl. Items affecting comparability, % <sup>1,2</sup>	10.2	5.4	10.2 <sup>5</sup>	5.4 <sup>5</sup>
Adjusted FFO/adjusted net debt, % <sup>1,2</sup>	53.4	41.5	53.4 <sup>5</sup>	41.5 <sup>5</sup>

1) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

2) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

3) Sales of electricity also include sales to Nord Pool Spot and deliveries to minority shareholders.

4) The value has been adjusted compared with information previously published in Vattenfall's financial reports.

5) Last 12-month values.

## CEO's comment

# Strong result and extensive investments for future energy needs

In 2025, the underlying operating profit increased due to improved development of price hedging on the continent and improved results from the nuclear operations. Vattenfall ends 2025 with a positive earnings development in the fourth quarter. We are continuing to work towards a fossil-free society and are presenting a comprehensive investment plan for the next five years.

### Higher average electricity prices despite very low prices in the north

Electricity prices in the Nordics were on average 10% higher in 2025 compared to last year. The development was driven by higher electricity prices in southern Sweden, Denmark and on the continent. Electricity prices in the north were at low levels due to a strong hydrological balance. In Germany and the Netherlands, electricity prices rose by 14% and 12% respectively, due to higher prices for gas and carbon dioxide emission allowances.

### Strong development of the underlying operating profit

The underlying operating profit for the full year 2025 increased by SEK 13.9 billion compared to 2024 and amounted to SEK 30.9 billion. This improvement was primarily driven by an improved development of price hedging in Vattenfall's continental markets and a higher contribution from nuclear operations. Lower contributions from hydro power in the Nordics and from the sales operations had a partially offsetting effect. In addition, the comparison was negatively affected by the divestment of the heat operations in Berlin (SEK -2.8 billion) which was consolidated until the beginning of May 2024.

The profit for the year amounted to SEK 19.7 billion and the Board of Directors proposes a dividend of SEK 8 billion. The result in 2024 was SEK 13.7 billion higher due to one-off effects of SEK 22.4 billion from the sale of the wind power projects Norfolk and 49% of Nordlicht as well as positive market value changes for energy derivatives.

### Continued clear direction towards fossil freedom

Thanks to our diversified and integrated business model, we can deliver good results and keep a high pace of our investments, even when conditions are challenging. Vattenfall plans to invest a total of SEK 165 billion between 2026 and 2030. Of the planned investments, 56% are growth investments. Important projects include the offshore wind power project Nordlicht in Germany, for which we made a final investment decision during the year, and the Zeevонk wind power project in the Netherlands which combines wind, solar and hydrogen. In 2025, we invested more than ever in strengthening and extending the Swedish electricity grid. Over the next five years, we plan to invest nearly SEK 47 billion to continue ensuring a secure and stable electricity grid.

In 2025, we have taken important steps on the journey towards new nuclear power in Sweden and, among other things, we have moved forward with two suppliers of modular reactors. We have also deepened our collaboration with the industrial consortium Industrikraft, which has acquired 20% of the shares in the project company Videberg Kraft AB. At the end of the year, we submitted the application for state aid required to take the next step towards new nuclear power on the Värö Peninsula at Ringhals.

The progress we made during the year would not have been possible without the dedication of our employees, which was evident not least during the intensive work to restore electricity supply for our customers after the storm Johannes hit during the last days of the year. Now the journey towards fossil freedom continues with profitable investments, more efficient ways of working and collaborations with our customers and partners.

Anna Borg  
President and CEO

# Group overview

Vattenfall generates electricity and heat from a portfolio of energy sources, such as hydro power, nuclear power, wind power, and some fossil fuels. We sell electricity, gas, and heat to private customers and businesses primarily in northern Europe. Vattenfall hedges parts of its future electricity generation through sales on the forward and futures markets.

## Market development

The electricity market has during 2025, compared to 2024, been characterised by higher prices on the Continent and in the southern parts of the Nordics. On the Continent, electricity prices increased due to higher gas prices and higher prices for emission allowances, which also affected electricity prices in the southern parts of the Nordics as these are closely connected. At the same time, electricity prices were very low in the most northern price areas, mainly due to a strong hydrological balance. The lower electricity prices in the north had a negative impact on Vattenfall's results.

### ELECTRICITY SPOT PRICES, EUR/MWh

The average spot price in the Nordics increased in 2025 compared with 2024. This is mainly explained by higher electricity prices in the southern parts of the Nordics, which were affected by higher prices on the Continent. The higher average spot prices on the Continent are primarily attributable to higher gas prices and higher prices for emission allowances.

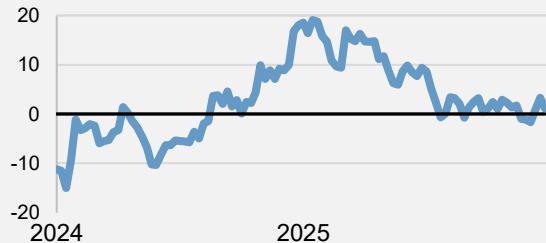

EUR/MWh	Jan-Dec		Oct-Dec		2024 Change	
	2025	2024	2025	2024		
Nordics	39.7	36.1	10%	50.8	31.0	64%
Germany	89.3	78.5	14%	93.2	102.7	-9%
Netherlands	86.8	77.3	12%	87.9	102.9	-15%

### NORDIC HYDROLOGY

Hydrological balance is a measure of the expected amount of energy that is stored in the form of snow, water reservoirs and groundwater in relation to normal circumstances. Historically, the electricity prices in the Nordics have had a negative correlation with the hydrological balance because the available hydropower capacity usually determines which type of energy is used. The electricity prices in the northern parts of the Nordics are still linked to the hydrological balance, while the correlation to the system price and price development in the southern parts has weakened.

The hydrological balance in the Nordics has gradually decreased from a high level at the beginning of the year, to a level close to normal by the end of 2025.

### NORDIC HYDROLOGICAL BALANCE (TWH)

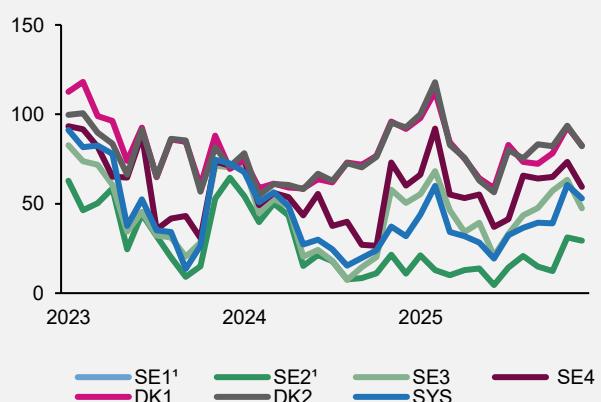

The filling level of Vattenfall's reservoirs amounted to 69% (82%) at the end of the year, which is 11 percentage points above the normal level.

### NORDIC PRICE AREA DIFFERENCES

The electricity market in the Nordics is divided into different price areas. In Sweden, there are four price areas and Vattenfall's hydro power assets are mainly in SE1 and SE2, while the nuclear power assets are in SE3. Vattenfall also has wind power assets, most of which are located in SE4. In Denmark, there are two price areas, and Vattenfall has wind power assets in both areas, DK1 and DK2. The Nordic system price (SYS) is a reference price for all price areas and is calculated by the electricity exchange Nord Pool. Vattenfall hedges a substantive portion of its electricity production against the Nordic system price. Thereby, price area differences have an effect on the company's result development.

### SPOT PRICES PER PRICE AREA AND SYSTEM PRICE (EUR/MWH)

<sup>1</sup>Difference between SE1 and SE2 is invisible due to high correlation

The price area differences have been on a higher level in 2025 compared with 2024. In northern Sweden, prices have decreased, while prices in the southern Sweden and in Denmark have increased relative to SYS. For Vattenfall, this means lower prices for the production in the north of Sweden, SE1 and SE2, compared with the production in the south of Sweden.

## INDICATIVE NORDIC HEDGE PRICES AND VOLUME HEDGE RATIO (SE, DK, FI) AS PER 31 DECEMBER 2025

Vattenfall's price hedging strategy is primarily focused on the Nordic generation assets because the primary risk exposure is linked to production of nuclear power and hydro power. The degree of hedging is highest for the next few years and decreases thereafter.

	2026	2027	2028
EUR/MWh	40	40	39
Hedge ratio (%)	53	27	7

## ACHIEVED NORDIC ELECTRICITY PRICES (SE, DK, FI)<sup>1</sup>

The achieved price is the average price that Vattenfall received for its electricity production during the period and is impacted by the hedge ratio and hedge price (see above), the spot price and effects from price area differentials.

	Jan-Dec		Okt-Dec	
	2025	2024	2025	2024
EUR/MWh	39	42	41	41

Vattenfall's achieved price in the Nordics has decreased during 2025 primarily due to lower market prices in northern Sweden.

## FUEL PRICES

The price of gas and carbon emission allowances affect mainly Vattenfall's heat operations in the Netherlands. Gas prices also affect the operations within the operating segment Customers & Solutions, which is responsible for gas sales to customers. Fuel prices have an impact on the electricity prices on the Continent which impacts the generations operations.

	Jan-Dec		Okt-Dec		
	2025	2024 Change	2025	2024 Change	
Gas (EUR/MWh)	36.3	34.4	6%	30.1	43.0
Coal (USD/t)	99.1	112.6	-12%	95.2	118.1
CO2 (EUR/t)	73.9	65.2	13%	80.9	65.8

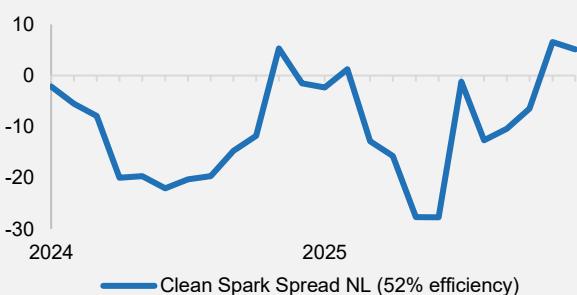

The price of gas was higher in 2025 compared with 2024 mainly due to reduced gas storage levels and geopolitical concerns. The price of carbon emission allowances also increased compared with 2024, primarily towards the end of the year, as the free allocation of allowances within the EU Emissions Trading System is gradually reduced from 2026.

<sup>1</sup> Achieved prices from the spot market and hedges. Includes Nordic hydro, nuclear and wind power generation

## PRICE MARGINS

The clean spark spread is the margin between the electricity price and the cost of gas and emissions allowances used for its generation. These spreads affect Vattenfall's heat business in the Netherlands where the fossil-fired combined heat-and power (CHP) plants and condensing plants are located. Gas constitutes a majority of the fuel supply for Vattenfall's heat production, but a smaller share of the company's electricity production.

### CLEAN SPARK SPREAD (EUR/MWh)

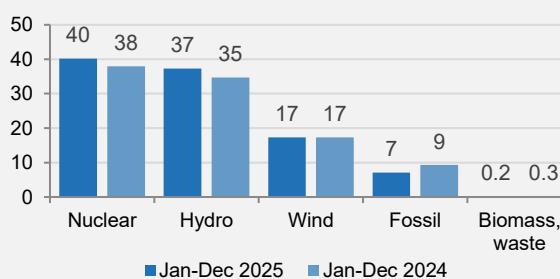

The monthly clean spark spread in the Netherlands was mostly negative during 2025, but at an improved level compared with 2024.

## Generation development

Total electricity generation increased by 2.5 TWh to 102.1 TWh (99.6) during 2025, mainly due to higher hydro power generation (+2.6TWh). Generation from nuclear power also increased (+2.3 TWh) primarily as a result of higher availability at Forsmark. These increases were partly offset, mainly due to lower fossil-based power generation (-2.3 TWh) as a result of the divestment of the heat operations in Berlin.

### ELECTRICITY GENERATION (TWh)

### AVAILABILITY

The availability of nuclear power and wind power is not comparable given that different methods are used as generation of electricity from nuclear power is plannable and generation of electricity from wind power is dependent on wind speeds. Availability of nuclear power is calculated as the available generation divided by the generation possible if operating at full capacity during the same period, excluding planned outages. Availability of wind power is calculated as the ratio of actual revenue to the sum of lost revenue and actual revenue. Availability of nuclear power measures performance in terms of production optimisation while for wind the performance is measured in terms of revenue optimisation.

	Jan-Dec	
	2025	2024
Nuclear <sup>1</sup>	94.4%	93.7%
Wind - offshore	93.5%	92.0%
Wind – onshore	95.8%	96.2%

The availability of Vattenfall's nuclear power increased during 2025, primarily as a result of higher availability at Forsmark. The availability of offshore wind power increased while the availability of onshore wind power slightly decreased compared with last year.

1) From the second quarter of 2025, nuclear availability is expressed according to UCR (Unit Capability Ratio) which isolates the effect of unplanned outages to give a more accurate picture of technical availability.

## INSTALLED WIND CAPACITY

New installed wind power capacity in the last 12 months amounted to 193 MW and is attributable to Bruzaholm (126 MW) and Velinga (67 MW).

	31 Dec 2025	31 Dec 2024
Onshore wind	2,288	2,095 <sup>2</sup>
Offshore wind	4,454	4,454
<b>Total (MW)</b>	<b>6,742</b>	<b>6,549</b>

## Sales development

Electricity sales, excluding sales to Nord Pool Spot and deliveries to minority owners, increased slightly to 116.5 TWh (115.9 TWh). Gas sales increased by 7.1 TWh to 65.0 TWh (57.9), primarily due to an increased customer base in Germany. The increase is also attributable to the divestment of the heat operations in Berlin. After the divestment on the 2nd of May 2024, Vattenfall sold gas externally to the company until the end of October 2025. This was previously accounted for as input in heat- and electricity generation. In addition, Heat sales declined by 4.6 to 4.5 TWh (9.1) due to the divestment of the heat operations in Berlin.

	Jan-Dec			Oct-Dec		
	2025	2024	Change	2025	2024	Change
Sales of electricity to customers , TWh	116.5	115.9	1%	42.3	30.4	39%
Sales of gas, TWh	65.0	57.9 <sup>2</sup>	12%	19.1	22.1 <sup>2</sup>	-14%
Sales of heat, TWh	4.5	9.1	-51%	1.4	1.6	-13%

## TEMPERATURE EFFECTS

Temperature effects have an impact on the sales volume within the Customers & Solutions operating segment. Lower temperatures usually mean an increased demand for heating (including gas) and electricity. In the Nordic countries, this mainly affects sales of electricity and heat. In Germany and the Netherlands, gas is still the main source of heat, which means that lower temperatures increase the demand for gas in addition to increased heat sales.

## TEMPERATURE DEVIATION FROM NORMAL LEVELS (°C)

	Jan-Dec		Oct-Dec	
	2025	2024	2025	2024
Nordics	1.4	0.9	1.8	1.5
Netherlands	1.1	1.3	1.1	1.0
Germany	0.8	1.5	0.6	1.0

During 2025, the temperatures in Vattenfall's markets were higher than normal, which affected sales negatively.

2) The value has been adjusted compared with information previously published in Vattenfall's financial reports.

## Net sales

**January–December:** Consolidated net sales decreased by SEK 10.7 billion (including negative currency effects of SEK 5.4 billion). The decrease is mainly explained by the divestment of the heat operations in Berlin, a shift in the geographic composition of customer sales of electricity, and negative price effects in customer sales of gas and electricity. This was partly offset by positive volume effects in customer sales of gas.

**October–December:** Consolidated net sales decreased by SEK 1.4 billion (including negative currency effects of SEK 1.8 billion). Net sales was primarily affected by positive price effects, partly offset by negative volume effects in customer sales of electricity.

## Earnings

**January–December:** The underlying operating profit increased by SEK 13.9 billion in total, which is explained by:

- Higher earnings contribution from the Power Generation operating segment (SEK +16.1 billion) mainly due to a better result from continental hedges in 2025, and higher cost for provisions related to future nuclear obligations that had a negative impact on 2024.
- Higher earnings contribution from the Distribution operating segment (SEK +0.7 billion), mainly explained by higher revenues as a result of tariff adjustments for the local grid and lower costs for grid losses.
- Higher earnings contribution from the Wind operating segment (SEK +0.2 billion) mainly driven by higher electricity prices.
- Lower earnings contribution from the Customers & Solutions operating segment (SEK -1.7 billion) mainly due to strong competition on the German market impacting the margins and customer base, as well as higher gas grid costs in Germany.
- Lower earnings contribution from the Other<sup>1</sup> operating segment (SEK -1.3 billion) which mainly is explained by the divestment of the heating business in Berlin, which was completed in the second quarter of 2024.
- Other items, net (SEK -0.1 billion)

Items affecting comparability for January–December 2025 amounted to SEK -3.8 billion (21.8), mainly related to changes in fair value of energy derivatives (SEK -2.8 billion), and impairment losses relating to district heating assets within the operating segment Customers & Solutions and wind power assets within the operating segment Wind (SEK -1.5 billion). See note 4 for further information.

Profit for the period amounted to SEK 19.7 billion (33.4), and the impact of lower items affecting comparability was partly offset by a higher underlying operating profit.

**October–December:** The underlying operating profit increased by SEK 8.5 billion to SEK 9.5 billion. The result was mainly driven by a higher contribution from the Power Generation operating segment (SEK +6.9 billion) primarily due to higher cost for provisions related to nuclear power in 2024. In addition, Wind (SEK +1.0 billion), Distribution (SEK +0.1 billion) and Other (SEK +0.5 billion) also contributed positively.

Items affecting comparability for the fourth quarter of 2025 amounted to SEK -0.2 billion (4.1), the majority of which relates to impairment losses (SEK -0.9 billion), partly offset by capital gains (SEK +0.5 billion). Profit for the period amounted to SEK 6.6 billion (5.1) and was, in addition to the items affecting comparability, impacted by higher returns from the Nuclear Waste Fund.

## Cash flow

**January–December:** Funds from operations (FFO) increased by SEK 6.4 billion mainly as a result of higher operating profit before depreciation and amortisation (EBITDA) adjusted for non-cash items. Cash flow from changes in working capital totalled SEK -18.6 billion. The main contributors were the net of received and paid margin calls (SEK -13.1 billion) and an increase in working capital in the Wind segment (SEK -3.8 billion). This was partly offset by decreased working capital in the Customers & Solutions segment (SEK +1.6 billion).

**October–December:** Funds from operations (FFO) increased by SEK 3.1 billion as a result of higher operating profit before depreciation and amortisation (EBITDA). Cash flow from changes in working capital amounted to SEK -7.2 billion and was mainly affected by increased working capital in the Customers & Solutions segment (SEK -6.0 billion), by the net of received and paid margin calls (SEK -1.5 billion), and by a decrease in inventories in the Power Generation segment (SEK +1.3 billion). This was partly offset by decreased working capital in the Power Generation segment (SEK +1.2 billion).

## KEY FIGURES – GROUP OVERVIEW

### Amounts in SEK million

	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024
Net sales	234 915	245 570	67 134	68 488
Operating profit before depreciation, amortisation and impairment losses (EBITDA) <sup>1</sup>	49 236	60 779	15 337	10 743
Operating profit (EBIT) <sup>1</sup>	27 102	38 851	9 279	5 023

1) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

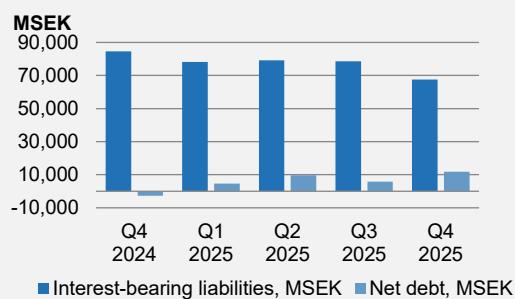

2) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

## Capital structure

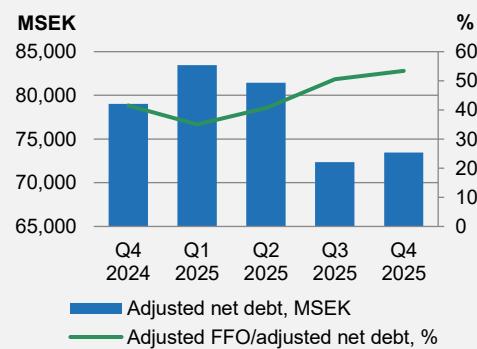

As of 31 September 2025, cash, cash equivalents and short-term investments amounted to SEK 55.3 billion, a decrease of SEK 31.8 billion compared to SEK 87.1 billion as per 31 December 2024. Vattenfall's credit facilities consist of a EUR 2.0 billion Revolving Credit Facility maturing 2028 and a EUR 1.0 billion facility maturing 2027. As per 31 December 2025, available liquid assets, including the credit facilities amounted to 35.7% of net sales. Vattenfall's policy is to maintain liquidity sources to cover the higher of 10% of the Group's annual turnover, or 90-days' stressed liquidity needs.

As per 31 December 2025, net debt amounted to SEK 11.7 billion compared to net cash of SEK 2.8 billion as per 31 December 2024. Adjusted net debt amounted to SEK 73.4 billion, a decrease of SEK 5.6 billion compared to 31 December 2024. The decrease is mainly explained by positive cash flow from FFO (SEK 41.8 billion) partly offset by negative cash flow from investments (SEK 30.4 billion) and dividend paid to the owner (SEK 7.0 billion).

### NET DEBT

### ADJUSTED NET DEBT

## Strategic focus areas and targets for 2025 & 2030

Vattenfall is taking the next step to enable the fossil freedom that drives society forward by introducing updated strategic targets for 2030. Building on the foundation set by our 2025 targets, these updated targets reflect our ambition to be a leader in the energy transition while ensuring a strong customer focus as a profitable energy company. Outcome for both the 2025 and 2030 targets are presented below. For more information about definitions, see page 12 and 13 in Vattenfall's Annual and Sustainability Report 2024.

Strategic focus area		Targets for 2025 & 2030	Outcome 2025	Outcome 2024
<b>Driving decarbonisation with our customers and partners</b>	<b>2025</b>	Customer engagement, Net Promoter Score (NPS) <sup>1</sup> : <b>+18</b>	<b>+19</b>	<b>+15</b>
	<b>2030</b>	Customer engagement, Net Promoter Score (NPS) <sup>1</sup> : <b>+20</b>	<b>+19</b>	<b>+15</b>
<b>Securing fossil-free energy supply</b>	<b>2025</b>	CO <sub>2</sub> emissions intensity <sup>2</sup> : <b>≤86 gCO<sub>2</sub>e/kWh</b>	<b>34</b>	<b>50</b>
	<b>2030</b>	Absolute CO <sub>2</sub> emissions (includes scope 1, 2 and 3) <sup>2</sup> : <b>18.2 Mt.</b>	<b>23.5<sup>10</sup></b>	<b>24.6</b>
<b>Motivating and empowering our people</b>		Lost Time Injury Frequency (LTIF) <sup>2,3</sup> : <b>≤1.0</b>	<b>1.7</b>	<b>1.4</b>
	<b>2025</b>	Employee Engagement Index <sup>1,2</sup> : <b>≥75%</b>	<b>81</b>	<b>82</b>
		Total recordable injury frequency (TRIF+) with a zero fatality threshold <sup>2,3</sup> : <b>&lt;2.0</b>	<b>3.5</b>	<b>3.5</b>
	<b>2030</b>	Employee Engagement Index <sup>1,2,4</sup> : <b>86</b>	<b>85</b>	<b>86</b>
		Driving diverse leadership <sup>5</sup> : <b>40%</b>	<b>34</b>	<b>34</b>
<b>Conduct high-performing operations<sup>7</sup></b>		Adjusted Funds From Operations (FFO)/adjusted net debt <sup>6</sup> : <b>≥25%</b>	<b>53.4%</b>	<b>41.5%<sup>9</sup></b>
		Return On Capital Employed (ROCE) excl. items affecting comparability <sup>6,8</sup> : <b>≥8%</b>	<b>10.2%</b>	<b>5.4%<sup>9</sup></b>

1) Reported on an annual basis.

2) For target definition and methodology see page 12-13 of Vattenfall's Annual and Sustainability report 2024.

3) Rolling 12-month values.

4) For the 2030 target the definition has been changed and includes more questions.

5) Metric measured by the Female Manager Ratio.

6) For definition see page 34.

7) Financial targets set over a business cycle, 5-7 years. Vattenfall's owner proposed updated financial targets that were approved at the Annual General Meeting 2025.

8) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

9) The value has been adjusted compared with information previously published in Vattenfall's financial reports.

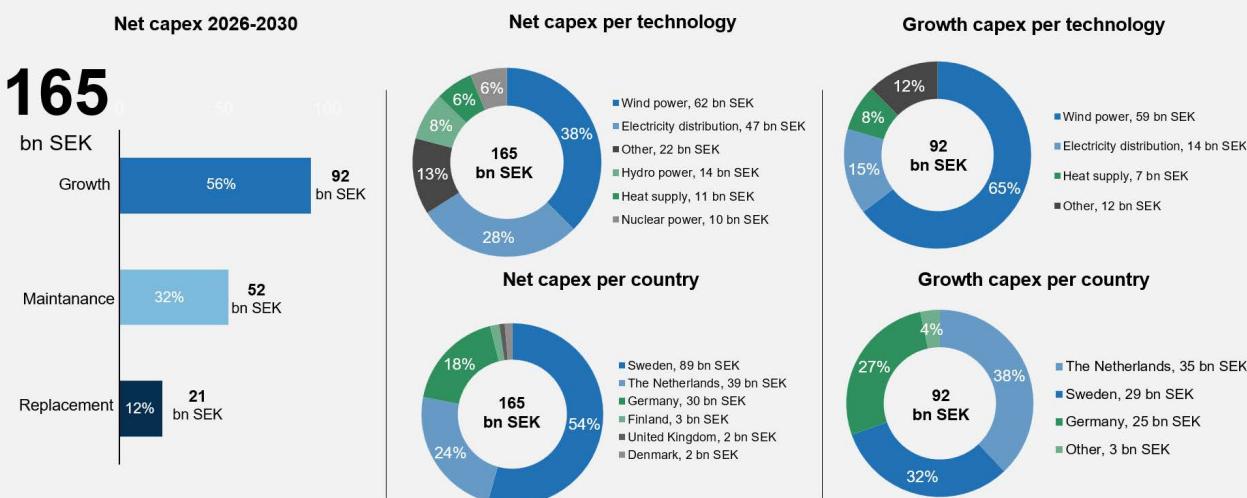

10) Absolute emissions defined in accordance with Vattenfall's Science-Based targets. The value is reflecting emissions during the period January-December 2025. Gas volumes sold to companies previously owned are not included in the target yet (2.4 Mio. tCO<sub>2</sub>e). With these gas volumes included the total absolute Scope 1, 2, 3 emissions are 25.9 Mio. tCO<sub>2</sub>e.

## Investment plan for 2026-2030

Vattenfall has decided on a 2026–2030 investment plan of SEK 165 billion net. Gross investments amount to SEK 239 billion and the difference is due to partnerships for offshore wind power projects, as well as assumptions about revenues from the divestment of onshore wind power projects and solar power projects developed for sale. The amounts stated below refer to net investments.

Growth investments amount to SEK 92 billion with the largest share, SEK 59 billion corresponding to 64%, planned to be invested in new wind power. Major investments include continued development and construction of the offshore wind farms Nordlicht I and II in Germany (together approximately 1.6 GW) and Zeevонk in the Netherlands (phased development with a total of 2 GW of offshore wind power, 0.5 GW of system integration and floating solar power). Another significant growth area is the development and expansion of our electricity grids in Sweden, with investments of approximately SEK 14 billion. Other growth investments primarily relate to the expansion of charging infrastructure for electric vehicles, strategic growth initiatives in hydro power, and the development of new nuclear power capacity in Sweden.

Vattenfall is also making extensive investments in maintenance, modernisation and replacement of existing assets and operations. Planned maintenance and replacement investments amount to approximately SEK 73 billion, of which SEK 33 billion relates to investments to strengthen our Swedish electricity grids and ensure quality of supply. In addition, investments are planned to modernise and ensure safe and reliable operation at the Swedish nuclear power plants, as well as investments in dam safety, and maintenance and renewal of our Nordic hydro power assets.

1) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

2) From 1 January 2025 Vattenfall Services is included in Distribution instead of Power Generation, comparable amounts have been updated. See Note 1 for more information.

3) "Other" pertains mainly to all Staff functions, including Treasury, Shared Service Centres and capital gains and -losses from divestment of shares. The heat operations in Berlin is included in Other until 2 May 2024.

## Customers & Solutions

The Customers & Solutions Business Area is responsible for Vattenfall's customer relations, heat plants and gas-fired condensing plants as well as sales of electricity, gas, heat and energy services.

### Strategic divestments and solutions supporting grid flexibility

- Divestment of Vattenfall's three power plants in the IJmond region in the Netherlands
- New charging solutions in the Netherlands and Sweden that support grid stability
- In Sweden, Vattenfall has divested parts of its customer contract portfolio in electric vehicle charging and will focus on its public charging network going forward

**Full year:** Net sales decreased by 4%, compared to 2024. Underlying operating profit decreased by 26%, primarily driven by strong competition on the German market impacting the margins and customer base, as well as higher gas grid costs in Germany. This was partly offset by a higher result from the heat business in Sweden due to revenues from ancillary services. The customer base decreased by 2% compared to the end of 2024, to 11 million contracts, mainly due to fewer customers in Germany. Electricity sales increased by 2% driven by higher sales volumes to grid operators in France and more business customers in the Nordics, partly offset by a decreased customer base in Germany. Sales of gas increased by 9% mainly driven by more customers in Germany and higher sales volumes to customers in the Netherlands.

**Q4:** Net sales decreased by 2% compared to the same period last year. Underlying operating profit was stable and increased by 3%. Electricity sales decreased by 2% mainly due to warm weather in the Nordics and decreased customer base in Germany, partly offset by higher sales volumes to grid operators in France. Sales of gas increased by 4% mainly driven by more customers in Germany.

In December, Vattenfall signed an agreement to sell its power plants in the IJmond region in the Netherlands to Tata Steel Netherlands. The divestment includes two power plants and one

combined heat and power plant. Ownership of the plants was transferred on 1 January 2026.

During the quarter, Vattenfall made progress with solutions that contribute to grid flexibility. In the Netherlands, Vattenfall won a tender to install five new fast charging stations with integrated batteries. The batteries are charged outside peak hours and provide additional energy during peak times, which contributes to future-proofing the charging network. In Sweden, Vattenfall has entered into a collaboration with Volvo Cars. As a first step, Vattenfall customers who purchase a new electric vehicles from Volvo in 2026 will receive free home charging for one year. The next step in the partnership involves making vehicle-to-grid technology available to Volvo customers, which can contribute to stabilising the energy grid feeding electricity back to the grid.

Vattenfall has divested its portfolio of customer contracts for electric vehicle charging in the workplace and residential segments in Sweden. As a result, Voltiva, a provider of electric vehicle charging solutions, will assume the management and operation of the customer-owned charging stations. Starting in January 2026, more than 700 customers and 11,000 charging points will gradually be transferred to Voltiva's platform. Going forward, Vattenfall in Sweden will focus on developing the public charging network for electric vehicles.

### KEY FIGURES – CUSTOMERS & SOLUTIONS

#### Amounts in SEK million unless indicated otherwise

	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024

Number of employees, full-time equivalents	5 518	5 507	5 518	5 507

## Power Generation

*Power Generation comprises the Generation and Markets Business Areas. The segment includes Vattenfall's hydro and nuclear power operations as well as optimisation and trading operations including certain large business customers. The result from hedging of the Group's net exposure in electricity and fuel is reported in this segment.*

### Further steps on the path towards new nuclear power

- Vattenfall's project company Videberg Kraft AB has applied for financing according to the Swedish state's risk sharing model for investments in new nuclear power
- An agreement has been signed with the Industry Consortium Industrikraft regarding the sale of 20% of the shares in the project company Videberg Kraft AB
- New initiatives are strengthening Vattenfall's position within energy flexibility

**Full-year:** Net sales decreased by 7% compared with last year. Underlying operating profit increased, mainly due to a better result from continental hedges in 2025, and higher cost for provisions related to future nuclear obligations that had a negative impact on 2024. Higher production volumes in both hydro power and nuclear power also had a positive impact. This was partly offset by lower electricity prices affecting Nordic hydro power.

**Q4:** Net sales decreased by 9%. Underlying operating profit increased, mainly due to higher cost for provisions related to future nuclear obligations that had a negative impact on the comparison period, and a better result from continental hedges in the fourth quarter 2025. In addition, higher production volumes from hydro and nuclear power, as well as higher prices had a positive impact. This was partly offset by a lower result from trading.

Vattenfall's project company Videberg Kraft AB, which will build and operate new nuclear reactors, has applied for financing according to the Swedish state's risk sharing model for investments in new nuclear power at the Värö Peninsula in Varberg Municipality. Once the application has been reviewed

by the Government Offices, negotiations on project terms will commence.

During the quarter, an agreement has been signed with nine companies in the industry consortium Industrikraft regarding the sale of 20% of the shares in the project company Videberg Kraft AB. The transaction was completed in January 2026.

Vattenfall has received approval for an additional permanent power increase of 50 MW at Forsmark 1, corresponding to approximately 0.4 TWh of electricity per year. Together with the 50 MW increase approved in April 2024, Forsmark 1 will now be able to deliver 1120 MW to Svenska Kraftnät, thereby strengthening Sweden's supply of fossil-free electricity.

Vattenfall continues to strengthen its position in energy flexibility. In the Netherlands, Vattenfall signed an agreement with Giga Storage securing 100 MW (400 MWh) of storage capacity, with planned commissioning in 2028. Vattenfall has also continued to pre-qualify its renewable assets for ancillary services. These initiatives are important for increasing grid flexibility and supporting the efficient integration of renewable energy.

### KEY FIGURES – POWER GENERATION<sup>1</sup>

Amounts in SEK million unless indicated otherwise	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024

Number of employees, full-time equivalents	5 561	5 450	5 561	5 450

1) From 1 January 2025 Vattenfall Services is included in Distribution instead of Power Generation, comparable amounts have been updated. See Note 1 for more information.

2) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

3) The value has been adjusted compared with information previously published in Vattenfall's financial reports.

## Wind

*The Wind Business Area is responsible for development, construction and operation of Vattenfall's wind farms as well as solar power parks and batteries.*

### Steps towards reduced emissions and new fossil free capacity

- Permit granted for the offshore wind farm Nordlicht II in Germany which thereby confirms final investment decision
- Strategic agreements to reduce emissions in the supply chain
- Vattenfall's plans for a large-scale battery solution in Brunsbüttel, Germany, have been approved by local authorities.

**Full year:** Net sales increased by 6% compared to 2024. The underlying operating profit increased by 3% mainly driven by higher electricity prices. This was partially counteracted by lower subsidies for German offshore wind farms. The comparison is negatively affected by unavailability compensation and insurance compensations in 2024. Electricity generation was at a similar level as in 2024.

**Q4:** Net sales increased by 13%. The underlying operating profit increased by 47% mainly as a result of higher electricity prices. The comparison is negatively affected by insurance and warranty compensations in 2024. Electricity generation increased by 14% due to higher generation from both offshore and onshore wind power.

In November, Vattenfall received planning permit for the Nordlicht II offshore wind farm off the coast of Germany, and in January 2026, an irrevocable permit for the project was granted. The wind farm will have an installed capacity of approximately 0.6 GW and together with Nordlicht I, it will deliver 6 TWh of fossil-free energy annually. The obtained permit confirms the full final investment decision for the wind farms, which are expected to be operational in 2028-2029.

Vattenfall is pursuing its ambition of net zero emissions by 2040 through several strategic initiatives aimed at reducing emissions in the supply chain. During the quarter, Vattenfall entered into a partnership with Cemvision for the delivery of cement with near-zero emissions. From 2028, this cement will be prioritised for onshore wind power projects, which is estimated to reduce carbon dioxide emissions by up to 95% compared to traditional cement. In addition, Vattenfall has signed an agreement to supply low-emission steel to the Juliusburg-Krukow solar farm in Germany. This is estimated to reduce emissions by approximately 450 tons of carbon dioxide compared to if conventional steel had been used.

In Germany, Vattenfall has received approval from local authorities to proceed with the plans for a large-scale battery solution at the decommissioned nuclear power plant in Brunsbüttel. The battery is expected to have a nominal output of 254 MW and a storage capacity of 700 MWh. The facility is planned to be operational in 2028.

### KEY FIGURES – WIND

Amounts in SEK million unless indicated otherwise

	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024
Net sales	22 885	21 585	7 558	6 660
External net sales	3 825	4 174	1 131	813
Underlying EBITDA	14 493	14 570	5 306	4 851

Sales of electricity, TWh	0.9	0.9	0.3	0.2
Number of employees, full-time equivalents	1 849	1 816	1 849	1 816

1) Including electricity generation from solar power.

## Distribution

The Distribution Business Area consists of Vattenfall's electricity distribution operations in Sweden, Vattenfall's service operations business and Power-as-a-Service offering.

### Extensive investments in the electricity grid

- Investments increased to SEK 10.9 billion (9.4) in 2025 to enable a secure and stable electricity supply.
- New contracts worth SEK 1.4 billion secured in Vattenfall's service operations business.
- Vattenfall has divested its electricity distribution operations in the UK.

**Full-year:** Net Sales increased by 12% compared with 2024.

The underlying operating profit increased by 27%. The profit was positively affected by higher revenues as a result of tariff adjustments for the local grid, lower costs for grid losses, and improved result from the services operations business thanks to new contracts. This was partly offset by higher depreciation as a result of growth.

**Q4:** Net sales increased by 12% compared with 2024. The underlying operating profit increased by 13%, primarily driven by higher revenues as a result of tariff adjustments for the local grid and improved result from services operations business thanks to new contracts.

Vattenfall continues to update and increase the capacity in the electricity grid. It is necessary to make extensive investments in the electricity grid to ensure a secure and stable electricity supply. In 2025, investments amounted to SEK 10.9 billion, an increase from SEK 9.4 billion the previous year. To enable these investments, an increase in the electricity grid tariffs has been announced for customers connected to the local grid. The new electricity grid tariff will come into effect on 1 January 2026 and the increase amounts to approximately 14%, which corresponds to approximately SEK 130 per month for customers living in a house with electricity heating and SEK 35 per month for customers living in an apartment.

To meet the high demand for electricity grid connections and a growing need for electricity, Vattenfall has decided to invest

#### KEY FIGURES – DISTRIBUTION<sup>1</sup>

Amounts in SEK million unless indicated otherwise	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024
Net sales	20 035	17 957	5 578	4 999

Number of employees, full-time equivalents	4 326	4 315	4 326	4 315

1) From 1 January 2025 Vattenfall Services is included in Distribution instead of Power Generation, comparable amounts have been updated. See Note 1 for more information.

2) Independent Distribution Network Operator.

## Other

*Other pertains mainly to all Staff functions, including Treasury, Shared Service Centres and capital gains and -losses from divestment of shares. Heat operations in Berlin are until the divestment in May 2024 included in Other.*

Net sales consist primarily of revenues attributable to Vattenfall's service organisations such as Shared Services, IT

and Vattenfall Insurance. Net sales also consisted of revenues from the heat business in Berlin until the sale in May 2024.

The underlying operating profit decreased 2025 compared to last year. This is due to the divestment of the heat business in Berlin, that was consolidated until 2 May 2024.

Unavailable liquidity	- 3 890	- 3 810
<b>Adjusted interest-bearing assets</b>	<b>56 633</b>	<b>76 415</b>
<b>Adjusted net debt<sup>2,5</sup></b>	<b>- 73 442</b>	<b>- 79 014</b>

1) Includes personnel-related provisions for non-pension purposes, provisions for tax and legal disputes and certain other provisions.

2) See Definitions and calculations of key ratios for definitions of Alternative Performance Measures.

3) 50% of Hybrid Capital is treated as equity by the rating agencies, which thereby reduces adjusted net debt.

4) The calculation is based on Vattenfall's share of ownership in the respective nuclear power plants, less Vattenfall's share in the Swedish Nuclear Waste Fund and liabilities relating to funding of decommissioning obligations in Stade and Brokdorf. Vattenfall has the following ownership interests in the respective plants: Forsmark 66%, Ringhals 70.4%, Brokdorf 20%, Brunsbüttel 66.7%, Krümmel 50% and Stade 33.3%. (According to a special agreement, Vattenfall is responsible for 100% of the provisions for Ringhals.)

5) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

1) See Definitions of key ratios for more information.

2) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

3) Previous financial target, and one of Vattenfall's strategic targets for 2025.

## NOTE 1 | Accounting policies, risks and uncertainties

### Accounting policies

This interim report for the Group has been prepared in accordance with IAS 34 "Interim Financial Reporting", and the Swedish Annual Accounts Act. The accounting policies and calculation methods applied in this interim report are the same as those described in Vattenfall's Annual and Sustainability Report 2024. No amended accounting standards or interpretations effective from 1 January 2025 have had a material impact on the Vattenfall Group's financial statements.

### Risks and uncertainties

For a description of risks, uncertainties and risk management, please refer to Vattenfall's Annual and Sustainability Report 2024, pages 45-57. Apart from the below and the information provided under "Business highlights" in this report and under "Business highlights" in previously published interim reports in 2025, no other material changes have taken place since publication of the Annual and Sustainability Report 2024.

Recent geopolitical developments, including renewed tariff measures by the U.S. administration, have increased uncertainty in global trade and energy markets and could cause higher volatility in pricing and currency fluctuations. A change in tariffs on raw materials or components could directly increase input costs, especially for projects. Furthermore, the group's suppliers and industrial customers could be impacted although the Group has its operations in Europe.

### Changes in operating segments

Vattenfall Services is included in the operating segment Distribution since 1 January 2025. Vattenfall Services has previously been included in the operating segment Power Generation. The comparative figures for 2024 have been adjusted accordingly in the segment reporting. No other changes have been made to the operating segments.

### Reclassifications in the balance sheet

The following reclassifications has been made in the balance sheet compared to Vattenfall's Annual and Sustainability Report 2024, the change was implemented as of the fourth interim report in 2025:

- Goodwill is presented on a separate line instead of part of other intangible assets.
- Intangible assets: current, has been reclassified to inventory.
- Contract assets/liabilities is part of other assets/liabilities.
- Margin receivables/liabilities is presented on separate lines instead of as part of advance payments paid/received and short-term investments/other interest-bearing liabilities.
- Advance payments paid/received has been reclassified to other assets/liabilities and margin receivables/liabilities.

Comparative amounts has been adjusted accordingly.

### Changes regarding key ratios

The following measures have been adjusted, or added since Vattenfall's Annual and Sustainability Report 2024:

- Items affecting comparability
- Adjusted profit for the period
- Adjusted net debt
- Adjusted FFO
- Adjusted FFO/Adjusted net debt

For information regarding the changes refer to "Definitions of key ratios".

Vattenfall has removed a number of key ratios from external reporting in order to clarify which key ratios are most important. The change was implemented as of the third interim report in 2025. See Quarterly information, Vattenfall Group for the key ratios that will continue to be reported.

### Other

Significant related-party transactions are described in Note 45 to the consolidated accounts in Vattenfall's Annual and Sustainability Report 2024. No material changes have taken place in relations or transactions with related parties since the publication.

## NOTE 2 | Exchange rates

### KEY EXCHANGE RATES APPLIED IN THE ACCOUNTS OF THE VATTENFALL GROUP

DKK			1.4489	1.5365
GBP			12.4014	13.8197
USD			9.2098	11.0299

## NOTE 3 | Financial instruments

### Accounting principles

For accounting policies applied, refer to Note 36, Financial instruments, in Vattenfall's Annual and Sustainability Report 2024.

### Difference between carrying amount and fair value

The carrying amounts of financial assets measured at amortised cost do not differ significantly from their fair values. The difference between carrying amounts and fair values for financial liabilities measured at amortised cost amounts to SEK 1 228 million (31 December 2024: 1 047).

### Fair value hierarchy level 3

Derivative liabilities within level 3 consist of an option to enter into a power purchase agreement (PPA) at a fixed price that Vattenfall granted to BASF as part of the consideration for the shares in Nordlicht, refer to Note 5, Acquired and divested operations, for further information.

Due to the long duration of the PPA, power forward rates are not observable for the duration of the contract. As the German power price is only observable for up to five years, Vattenfall have used a fundamental long-term market outlook for forward rates. Vattenfall has used historical forward curves which has been extrapolated to estimate volatility.

### FAIR VALUE HIERARCHY AS PER 31 DECEMBER 2025

## NOTE 4 | Items affecting comparability

Amounts in SEK million	Full year 2025	Full year 2024	Oct-Dec 2025	Oct-Dec 2024
Capital gains	680	9 852	540	80
Capital losses	- 65	- 1 765	- 46	- 31
Impairment losses <sup>1</sup>	- 1 514	- 1 335	- 874	- 2
Reversed impairment losses	—	15	—	15
Provisions	654	643	152	327
Changes in the fair value of energy derivatives	- 2 766	12 668	- 101	2 848
Changes in the fair value of inventories	- 810	1 528	145	673
Other non-recurring items affecting comparability	- 14	186	- 4	191
<b>Items affecting comparability<sup>2,3</sup></b>	<b>- 3 835</b>	<b>21 792</b>	<b>- 188</b>	<b>4 101</b>

Items affecting comparability during January-December 2025 amounted to SEK -3,835 million. Impairments amounted to SEK 1,514 million, mainly relating to district heating assets within the operating segment Customers & Solutions and assets within the operating segment Wind. The changes in fair value of energy derivatives and inventories amounted to SEK -3,576 million in total.

Items affecting comparability during January-December 2024 amounted to SEK 21,792 million. Capital gains- and losses amounted to SEK 8,087 million, mainly relating to the sale of Norfolk Offshore Wind Zone, the heat operations in Berlin and 49% of the shares in Vattenfall's offshore wind farms Nordlicht I and II. The changes in fair value of energy derivatives and inventories amounted to SEK 14,196 million in total.

- 1) For more information on impairment losses see Note 6, Impairment losses and reversed impairment losses.
- 2) See Definitions of key ratios for definitions of Alternative Performance Measures.
- 3) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

## NOTE 5 | Acquired and divested operations

### Acquired operations

#### *Nordlicht I and II*

Vattenfall repurchased 49% of the shares in Nordlicht I and II on the 25th of March 2025, BASF purchased the shares in 2024. The transaction has been recognised within equity as Vattenfall fully consolidated Nordlicht I and II before the purchase of shares. The consideration amounted to EUR 181 million, out of which EUR 80 million has been transferred in cash and the remaining amount consist of a written option to enter into a power purchase agreement. Refer to Note 3, Financial instruments, for further information regarding the option. The cash flow from the repurchase of the shares has, in accordance with the previous year's divestment of the same shares, been classified within investing activities in the cash flow statement.

Vattenfall has issued additional guarantees as a result of the repurchase, refer to Note 7, Contingent liabilities for more information.

### Divested operations

#### *Rostock*

On 1 October 2025, Vattenfall finalized the divestment of the waste to energy plant in Rostock, Germany. The purchase price for the shares amounted to SEK 483 million and the capital gain was SEK 373 million.

No other major operations have been divested during the year.

#### **Assets held for sale**

Some assets related to the operating segment Customers & Solutions have been classified as assets held for sale during the third and forth quarter respectively since it is highly probable that these assets will be recovered principally through a divestment rather than through continuing use. The assets are available for immediate sale in their present condition. The divestments are expected to be finalised during the first and second quarter 2026.

## NOTE 6 | Impairment losses and reversed impairment losses

### Accounting policy

Assessments are made on a regular basis throughout the year for any indication that an asset may have decreased in value. If any such indication is identified, the asset's recoverable amount is estimated and an impairment test is performed. The principles for impairment test are described in Note 27, Impairment losses and reversed impairment losses, in Vattenfall's Annual and Sustainability Report 2024.

### Impairment losses

Impairment losses amounting to SEK 1,514 million (1,753) were recognised in 2025.

In the fourth quarter, an impairment of SEK 762 million was recognised relating to district heating assets within the operating segment Customers & Solutions, driven by expected lower future cash flows. In addition, an impairment of SEK 112 million related to wind power assets within the operating segment Wind was recognised, primarily driven by deteriorating outlook for electricity prices.

In the second quarter 2025, impairments of SEK 640 million were recorded. The impairments are related to onshore wind assets in Sweden and were mainly driven by deteriorating outlook for electricity prices.

No previously recognised impairment losses have been reversed in the income statement during the year.

## NOTE 7 | Contingent liabilities

### Accounting policy

For a description of accounting policies applied, refer to Note 40, Contingent liabilities, in Vattenfall's Annual and Sustainability Report 2024.

### Changes in contingent liabilities

Refer below for significant changes in contingent liabilities since 31 December 2024.

#### **Commitments related to Swedish nuclear waste**

In 2025, the Government decided to increase the amounts for Vattenfall AB's guarantees for its subsidiaries Forsmarks Kraftgrupp AB and Ringhals AB relating to the Financing Security and Supplementary Security to, in total, SEK 47.2 billion which is an increase by SEK 5.5 billion compared to 31 December 2024.

In December 2025, the Government decided that the guarantees related to the Financing Security will be increased further during 2026. For Vattenfall, this means that the Financing Security for Forsmarks Kraftgrupp AB and Ringhals AB will increase by SEK 2.7 billion in total during 2026.

#### **Commitments related to Wind Power, Nordlicht I and II**

Vattenfall has issued additional guarantees of SEK 3.1 billion as a result of the repurchase of 49% of the shares in Nordlicht I and II and as a result of agreements that Vattenfall has entered into with suppliers. Refer to Note 5, Acquired and divested operations, for more information regarding the repurchase of shares.

#### **Other commitments**

In the Netherlands, a mass claim has been initiated against several energy companies, including Vattenfall. The claim concerns compensation for allegedly unlawful price increases. Vattenfall, like the other energy companies involved, disputes the claim. Based on the information currently available, Vattenfall assesses that it is not likely that a significant outflow of compensation will be required to settle the claim.

## NOTE 8 | Events after the balance sheet date

No events have occurred after the balance sheet date that are expected to have a significant impact on the consolidated financial statements.

# The Parent Company Vattenfall AB

## Accounting policies

This interim report for the parent company has been prepared in accordance with the Swedish Annual Accounts Act and RFR 2, Accounting for Legal Entities. The accounting policies applied in this interim report are the same as those described in Vattenfall's Annual and Sustainability Report 2024.

- The balance sheet total amounts to SEK 312,037 million (342,985).
- Investments during the period amounted to SEK 6,022 million (4,220).
- Dividend paid to the owner of SEK 7,000 million (4,000).
- Cash and cash equivalents, and short-term investments amounted to SEK 50,192 million (77,420).

## Period in brief January – December 2025

- Net sales amounted to SEK 47,189 million (47,481). The slightly lower net sales are mainly explained by the development in electricity prices.
- Costs of purchases amounted to SEK -30,454 million (-17,930). SEK 11,940 million of the change is explained by a decreased unrealised market value for energy derivatives for future energy production.
- Result from participations in subsidiaries amounted to SEK 4,441 million (29,171) of which SEK 7,809 million relates to dividends from subsidiaries in Germany. This was partly offset by impairments of shares, mainly relating to Vattenfall Vindkraft AB. The impairments are related to onshore wind assets in Sweden and were mainly driven by deteriorating outlook for electricity prices.
- The financial net amounted to SEK 2,660 million (-4,431). The increase is primarily explained by a stronger SEK against EUR and GBP compared to the same period last year.
- Profit for the period is SEK 9,203 million (39,257).

## Risks and uncertainties

Refer to Note 1 to the consolidated accounts, Accounting policies, risks and uncertainties.

## Contingent liabilities

The Swedish government has set new amounts for Vattenfall AB's guarantees for its subsidiaries Forsmarks Kraftgrupp AB and Ringhals AB relating to the Financing Security and Supplementary Security to, in total, SEK 47,2 billion which is an increase by SEK 5,5 billion compared to year end 2024.

In December 2025, the Government decided that the guarantees related to the Financing Security will be increased further during 2026. For Vattenfall, this means that the Financing Security for Forsmarks Kraftgrupp AB and Ringhals AB will increase by SEK 2,7 billion in total during 2026.

## Other

Significant related-party transactions are described in Note 45 for the parent company, Related party disclosures, in Vattenfall's 2024 Annual and Sustainability Report. No material changes have taken place in relations or transactions with related parties compared with the description in Vattenfall's 2024 Annual and Sustainability Report.

2) Future commitments for nuclear power operations have been reclassified from Other non-interest-bearing liabilities (long-term) to Provisions. Comparative amounts have been updated.

# Definitions of key ratios

## Alternative Performance Measures

In order to ensure a fair presentation of the Group's operations, the Vattenfall Group uses a number of Alternative Performance Measures that are not defined in IFRS or in the Swedish Annual Accounts Act. The Alternative Performance Measures that Vattenfall uses are described below. The Alternative Performance Measures used are unchanged compared with prior periods except for the following measures that have been changed or added since Vattenfall's Annual and Sustainability report 2024:

- Items affecting comparability
- Adjusted profit for the period
- Adjusted net debt
- Adjusted FFO (funds from operations)
- Adjusted FFO/Adjusted net debt

For further information on the changes refer to each measure below.

**Operating profit (EBIT, Earnings Before Interest and Tax):** The difference between the operating income and the operating expenses, including share of profit from associated companies and joint ventures. Refer to Consolidated income statement.

**Operating profit before depreciation, amortisation and impairment losses (EBITDA, Earnings Before Interest, Tax, Depreciation and Amortisation):** Refer to Consolidated income statement.

**Items affecting comparability (IAC):** Capital gains and capital losses from sale of shares and other non-current assets, impairment losses and reversed impairment losses from assets in operation or under construction and other material items that are of an infrequent nature. Also included here are changes in the fair value of energy derivatives, which do not qualify for hedge accounting. From Q1 2025, changes in fair values of energy derivatives as well as inventory revaluation for proprietary trading activities are recognized in the underlying operating profit to better reflect the overall trading performance. Prior periods have been restated to reflect this change. Refer to Note 4, Items affecting comparability for a reconciliation.

**Underlying operating profit (Underlying EBIT):** Underlying operating profit excluding items affecting comparability. This measure is intended to provide a more fair comparison between periods by excluding items affecting comparability that are of an infrequent nature. Refer to table below for reconciliation.

**Underlying operating profit before depreciation, amortisation and impairment losses (Underlying EBITDA):** Operating profit excluding items affecting comparability and depreciation amortization and impairment losses. This measure enables a more fair comparison between periods. This is enabled by excluding items affecting comparability that are of an infrequent nature and in addition excluding items not affecting cash flow such as depreciation amortization and impairment losses. Refer to table below for reconciliation.

**Adjusted profit for the period:** Profit for the period, attributable to owner of the parent company excluding fair values and return from the Swedish Nuclear Waste Fund. Vattenfall's dividend policy is based on this measure.

**Interest-bearing liabilities:** Refer to supplementary information in connection with the Consolidated balance sheet for a reconciliation.

**Net debt:** Refer to supplementary information in connection with the Consolidated balance sheet and the Consolidated statement of cash flow for reconciliations.

**Adjusted net debt:** From Q1 2025 are margin calls from energy trading excluded from adjusted net debt. Margin calls from treasury activities have been excluded previously and are still excluded. The new definition is more in line with the definition used by rating agencies. Refer to supplementary information in connection with the Consolidated balance sheet for reconciliation.

**Capital employed:** Total assets less financial assets, non interest-bearing liabilities and certain other interest-bearing provisions which are not included in adjusted net debt. Refer to supplementary information in connection with the Consolidated balance sheet for reconciliation.

**Return on capital employed (ROCE):** Operating profit divided by average capital employed. Financial target 2025 that measures profitability. Refer below for reconciliation.

**Return on capital employed excluding items affecting comparability (ROCE excl IAC):** Underlying operating profit divided by average capital employed. Financial target 2030 that measures profitability. This measure excludes items affecting comparability to better reflect the underlying operations. Refer below for reconciliation.

**Return on equity:** profit for the period attributable to owner of the parent company divided by average equity attributable to owners of the parent company, excluding the hedging reserve. This key ratio measures profitability by showing how much profit is generated in relation to its equity. The key ratio has been included because it is a common key ratio for measuring profitability.

**Net debt/EBITDA and Adjusted net debt/EBITDA:** Net debt/ adjusted net debt divided by operating profit before depreciation, amortisation and impairment losses (EBITDA). This key ratio measures the debt ratio and shows how many years a company needs to repay its debts, given a constant level of net debt and EBITDA. The key ratio is used by rating agencies when assessing their rating of Vattenfall.

**Funds from operations (FFO):** Refer to Consolidated statement of cash flow.

**Adjusted FFO:** New measure since 1 January 2025 that is part of the financial target 2030, Adjusted FFO/adjusted net debt. Funds from operations excluding dividend attributable to non-controlling interests. Non-controlling interest has been excluded as it can't be used to service debt and to better align with the definition used by rating agencies. Refer to supplementary information in connection with the Consolidated statement of cash flow for reconciliation.

**FFO/adjusted net debt:** Measure has been replaced with Adjusted FFO/adjusted net debt as financial target regarding capital structure.

**Adjusted FFO/adjusted net debt:** Adjusted FFO divided by adjusted net debt. New financial target 2030 regarding capital structure. The key ratio is a measure of Vattenfall's ability to generate operating cash flow in relation to its debt. The new measure is more in line with the definition used by rating agencies. Refer below for reconciliation.

**Free cash flow:** Cash flow from operating activities less maintenance investments. Refer to Supplementary information in connection to Consolidated statement of cash flow for a reconciliation.

**FFO interest cover:** Funds from operations (FFO) and financial expenses excluding the unwinding of discount on provisions, divided by financial expenses excluding the unwinding of discount on provisions. This key ratio measures a company's ability to meet its interest obligations using funds from operations. The key ratio is used by rating agencies when assessing their rating of Vattenfall.

<b>Adjusted profit for the period</b>	<b>19 849</b>	<b>19 972</b>	<b>5 926</b>	<b>3 371</b>

1) The key ratio has been adjusted and prior periods have been restated, see Definitions of key ratios for more information.

## FINANCIAL TARGETS

Key ratios based on last 12-month values January 2025 – December 2025:

$$\text{Return on capital employed excl. items affecting comparability, \%} = 100 \times \frac{\text{Underlying EBIT}}{\text{Capital employed, average}} = \frac{30 937}{304 650} = 10.2$$

$$\text{Adjusted FFO/adjusted net debt, \%} = 100 \times \frac{\text{Adjusted FFO}}{\text{Adjusted net debt}} = \frac{39 224}{73 442} = 53.4$$

## OTHER KEY RATIOS

Key ratios based on last 12-month values January 2025 – December 2025:

$$\text{Return on equity, \%} = 100 \times \frac{\text{Profit for the period attributable to owner of the parent company}}{\text{Average equity attributable to owner of the parent company excl. the hedging reserve}} = \frac{18 614}{176 077} = 10.6$$

$$\text{FFO interest cover, (times)} = \frac{\text{FFO} + \text{financial expenses excl. discounting effects attributable to provisions}}{\text{Financial expenses excl. discounting effects attributable to provisions}} = \frac{46 317}{4 470} = 10.4$$

$$\text{Net debt/EBITDA, (times)} = \frac{\text{Net debt}}{\text{EBITDA}} = \frac{11 728}{49 236} = 0.2$$

$$\text{Adjusted net debt/EBITDA, (times)} = \frac{\text{Adjusted net debt}}{\text{EBITDA}} = \frac{73 442}{49 236} = 1.5$$

$$\text{Return on capital employed, \%} = 100 \times \frac{\text{EBIT}}{\text{Capital employed, average}} = \frac{27 102}{304 650} = 8.9$$

$$\text{FFO/adjusted net debt, \%} = 100 \times \frac{\text{FFO}}{\text{Adjusted net debt}} = \frac{41 847}{78 678} = 53.2$$

## **Dividend**

In accordance with Vattenfall's dividend policy, the Board of Directors proposes a dividend of SEK 8,000 million.
