Outlook

- High level of investment in the oil, gas and energy sector - expect continued low unemployment and increasing housing construction in the group's market area.
- However persistent international uncertainty may potentially have negative consequences for the Norwegian economy as well.
- Good credit quality and low level of non-performing loans; continued low level of losses and write-downs expected.
- New regulations, including stricter requirements to capital and financing, can lead to a need for less capital-intensive growth than what has been common in recent years.
 - Lending growth easing off in the future
- The focus on streamlining operations and generating revenues from many product and service areas in conjunction with slightly higher spreads on ordinary lending to customers are contributing to expectations of continued good earnings for the group in the current year
