

Paytrail chooses payment module created by Digia as an official Magento 2 module

The module enables the use of the Paytrail payment method in online stores built on the Magento 2 eCommerce platform.

Paytrail has chosen a module created by Digia to serve as an official Magento 2 module. As an official module, it's functionality is proven and meets the high quality standards of both Magento and Paytrail.

Over 10,000 online stores use Paytrail's payment transfer service, having sold over two billion euros' worth of products and services in this way. In commercial terms, Magento is a key eCommerce platform for Paytrail. Due to its broad customer base, the module's reliability and functionality are extremely important to Paytrail.

"The Magento 2 module is crucial to Paytrail, so we need to be sure that everything works both overall and in detail. With its module, Digia was able to meet our high quality requirements," comments Sales Director **Petri Itkonen** of Paytrail.

Close cooperation will also bring Paytrail's services close to Digia's customers.

"We are delighted to be able to continue and expand on the good cooperation we have embarked on with [Igence](#), alongside Digia. We want to bring our expertise, experience and services within reach of Digia's customers," continues Itkonen.

Digia's Business Development Executive, **Jaakko Saari**, points out that a reliable product is the result of strong cooperation and an expert team.

"Cooperation with Paytrail has been extremely smooth from the very beginning. Our experienced project team has built an outstanding module, based on which eCommerce customers can use Paytrail's flexible services in a user-friendly manner," states Saari.
