Getinge Interim Report January-March 2022: Healthy order book but supply chain challenges

“Net sales declined by 6.4% and the order intake fell organically by 4.4% in the quarter,” says Mattias Perjos, President & CEO. “However, excluding the strong sales of ventilators in 2021, we had organic growth in both order intake and net sales. The order book grew 8% during the quarter and is 21% higher now than the same period in 2021, excluding currency fluctuations”.

Getinge has a strong pipeline of orders and the sales forecast for the full-year remains unchanged. The deliveries were negatively affected toward the end of the quarter as a result of temporary supply chain challenges. The company estimates that net sales corresponding to SEK 300 M have been delayed as a result of the shortage of components.

“Like many others, we have been impacted by Russia’s invasion of Ukraine, says Mattias Perjos, President & CEO. “We do not have any production or major deliveries in these countries, but it can indirectly result in higher costs for input goods and delays, which will ultimately affect patients and hospitals around the world. Our customers have been understanding about the situation and appreciate the products and services that we offer, which provide a solid platform for productive dialogue in the current situation”.

Getinge has well-functioning methods for ensuring access to components and transportation, and expects to meet major deliveries during the second half of the year.

The gross margin could be maintained in the quarter despite lower volumes from ventilators and negative mix effects and challenges in the supply chain. The EBITA margin was adversely affected by lower volumes and an unfavorable product mix. Getinge expects to see a strong recovery in margins as volumes increase throughout the rest of the year.

January – March 2022 in brief

- Net sales declined organically by 6.4%. The organic order intake declined by 4.4%.
- Adjusted gross profit amounted to SEK 3,261 M (3,285) and the margin was 52.7% (53.3).
- Adjusted EBITA amounted to SEK 839 M (1,079) and the margin was 13.6% (17.5).
- Adjusted earnings per share amounted to SEK 2.11 (2.68).
- Cash flow after net investments amounted to SEK 420 M (2,026).

Phone Conference

A conference call will be held on April 26, 2022, at 10:00-11:00 am CEST hosted by Mattias Perjos, President & CEO, and Lars Sandström, CFO. Please see dial in details below to join the conference:

SE: +46 8 505 583 66

UK: +44 333 300 92 71

US: +1 631 913 14 22

During the conference call a presentation will be held. To access the presentation through webcast, please use this link: <https://tv.streamfabriken.com/getinge-q1-2022>

Alternatively, use the following link to download the presentation:
