

Climate Signature Initiative

Joins forces with

The UN Seal the Deal Campaign

Vattenfall intends to support decisions makers in taking the necessary action to make it easier for everyone, companies and individuals, to combat climate change. We drew up a Climate Manifesto and asked people on our markets to show their support and sign it. The Manifesto asserted the need for:

1. A global price on carbon dioxide emissions
2. More support for climate friendly technologies
3. Implementation of climate requirements for products

The Climate Manifesto have gathered over
244.192 signatures to date.

Now is time for the Climate Signature Initiative to join forces with The UN Worldwide Seal the Deal campaign. Together, these two initiatives will further compel and necessitate the right decisions at the COP 15 summit, decisions people all over the world are depending upon and expect.

Yours truly,

A handwritten signature in blue ink, appearing to read 'Lars G Josefsson', written over a dotted line.

Lars G Josefsson
