

*Press release from Telio  
Oslo, Norway, 30<sup>th</sup> November 2010*

## **Telio bundled with iPad**

**Telio to start shipping Teliophone bundled with Apple's iPad. This is a new method of distributing Telio's access independent telephony services.**

The bundle will be launched at the price of NOK 2,995 with a Telio Mini subscription of NOK 159 per month. Through Teliophone it is possible to call any number on the traditional fixed and mobile networks all over the world at prices from 0,- per minute.

"As iPad has become available for the Norwegian market, Telio will start shipping it bundled with its new Teliophone application. This new way of distributing Telio services is very exciting and shows one of the many new possibilities with Teliophone, which also works on iPhone and iPod Touch," says Eirik Lunde, CEO of Telio Holding ASA.

Telio on iPad enables you to use iPad as your household and office telephone, and when travelling Teliophone will allow you to call with a Norwegian number anywhere in the world. For many customers this will eliminate high international mobile roaming cost both for incoming and outgoing calls.

"Teliophone enables our customers to achieve substantial savings for a number of their calling scenarios and especially when travelling outside Norway. For many customers this will be a possibility to substantially reduce the very high roaming costs," says Eirik Lunde.
